

MOVE
TO ZERO

We seek to **minimize environmental impacts** along the **entire lifecycle** of our products and mobility solutions, in order to **safeguard the ecosystem** and **create value on society** in compliance with environmental regulations and standards.

FIELDS OF ACTION

protect **Climate**

We are committed to **the Paris Agreement** and aim for a **1.5° ambition level**.

We consequently focus on the **electrification of our products**, the **decarbonization of our entire value chain**, and the expansion of **renewable energy generation** to supply our sites and customers.

By 2050 at the latest, we want to be a **net CO₂ neutral** company.

conserve **Resources**

By using **recycled materials and renewable resources**, we reduce our need for primary raw materials.

We improve our **energy and resource efficiency** and establish **closed cycles** for **materials and water**.

Together with our business partners, we reduce the use of natural resources along our **supply chain**.

preserve **Ecosystems**

We reduce harmful **emissions into air, soil and water**.

We reduce the impacts of our business activities on **biodiversity and ecosystem** services and promote projects to preserve them.

ensure **Environmental Compliance**

We want to be a role model for a modern, transparent and successful company in terms of **integrity and compliance**.

We operate effective **environmental compliance management systems** to identify and manage Environmental risks and opportunities along the lifecycle of our mobility solutions.

We have an **open dialogue with our stakeholders** and consider their expectations in our decisions.
