

Connectivity Guide

My SEAT App

My SEAT App.

With the free application My SEAT App and the DataPlug, you will be able to make your SEAT into a connected car (compatible with vehicles manufactured since 2008). Find out how to do it in this short guide.

Welcome to My SEAT App.

Download My SEAT App free of charge

Functions.

My SEAT App currently has the following functions (remember that some of them are only available if the application is connected to a DataPlug via Bluetooth*):

Interactive Manual.

Enjoy the experience of a manual that is fast and easy to use.

Trips*.

Save the record of your trips (date, time, total kilometres, or cost).

Car metrics*.

See your car's information (consumption, total kilometres, or autonomy).

Car Status*.

Find out if your car has any sort of problem and understand what is wrong with it.

Parking*.

Remember where your car is parked and calculate the time and estimated route.

SEAT Offers.

Personalized offers for your model of car.

Maintenance Plan.

Review the maintenance actions related to your car.

Make an Appointment.

Ask for an appointment with your favourite authorized service.

Control of Expenses.

Oversee all your expenses (petrol, fines, etc.).

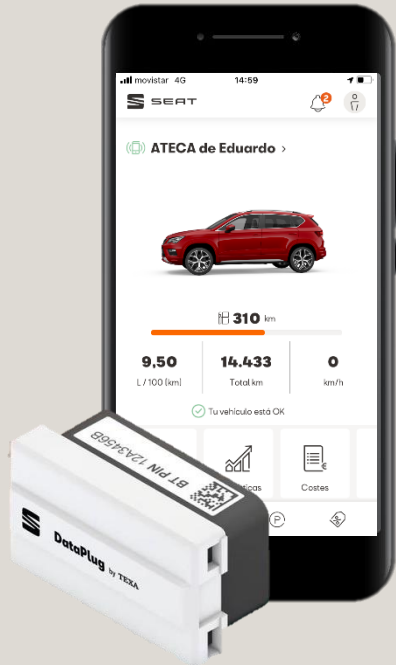

Discover more functions.

What do you need?

Before starting the process of coupling your SEAT with My SEAT App, make sure you have everything ready:

My SEAT App

Downloading the app is totally free of charge. Find it at Apple Store or Google Play (Android 5.0 or iOS 9.0 operating system or later required). The application also needs a connection to the internet.

DataPlug

You will find this Data Plug at your nearest SEAT dealership.

Compatible Car

You can use the app with SEAT manufactured since 2008. You can check your vehicle's compatibility on the following website: www.seat.es/myseatapp

SEAT ID

You can create your SEAT ID directly in My SEAT App. SEAT ID allows you to enter SEAT applications and websites easily.

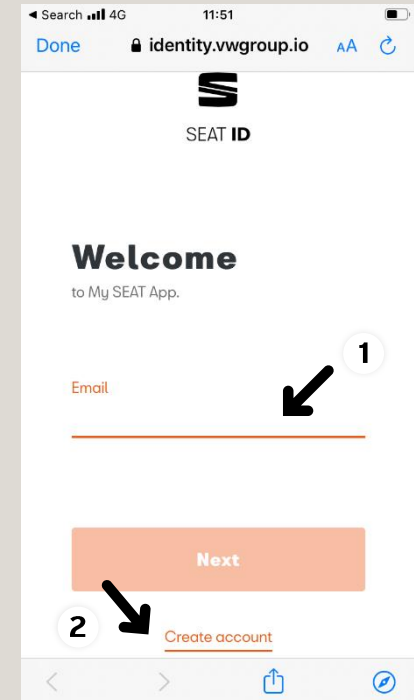

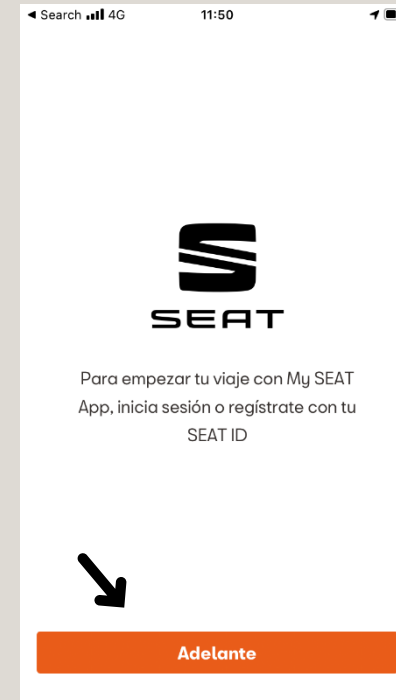

SEAT ID

1. Process in My SEAT App

When you open My SEAT App for the first time, these are the screens that will appear. You need only enter (1) or create a new account (2) following the instructions that appear.

Once you have registered the SEAT ID, you'll be able to enter My SEAT App. For more information about SEAT ID, go to the following website: <https://seatid.vwgroup.io/landing-page>

Connect your vehicle with My SEAT DataPlug.

2. Process in the car

Once your SEAT ID is created, the next step will be to connect the DataPlug in your SEAT.

Insert the DataPlug in your car's OBD2 port, which is usually located near the driver's feet, either underneath the steering wheel or in the fuse box (3). This process must be done with the **engine off** and then turn it on.

Once it is turned on, you will be able to see whether the DataPlug is connected right, because a green LED light will come on.

3

3. Process in My SEAT App

Turn on the mobile phone's Bluetooth and allow it to find your location.

On the main screen of My SEAT App you will see the option to **connect a car** (4). When you select it, a window will open where you can connect it **using a DataPlug** (5).

If the DataPlug is connected correctly and the engine is on, a message asking permission to link will appear (6).

Insert the 8-digit BT PIN that you will find on the box and on the DataPlug itself (7).

Once the process is completed, an icon shaped like a smartphone will appear in the upper left corner of the main screen, and it will show whether the DataPlug is connected (green) or not (grey) (8).

9

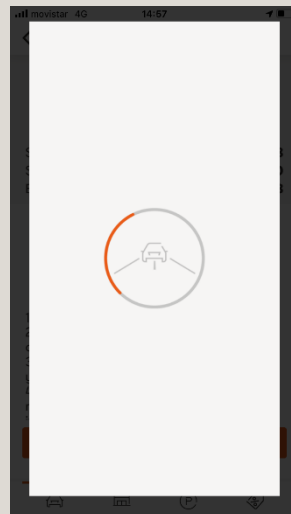

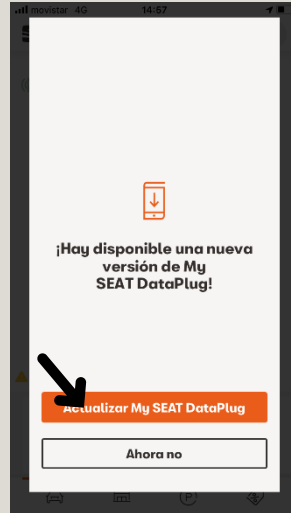

10

Connect your vehicle with My SEAT DataPlug.

If there is a new version of My SEAT DataPlug, a window will appear after the coupling process, to update it (9).

9

To finish the process, you must activate the alerts about the car's status.

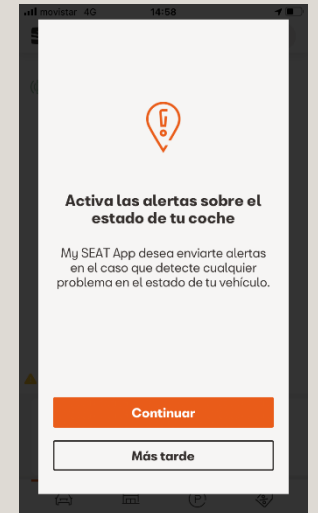

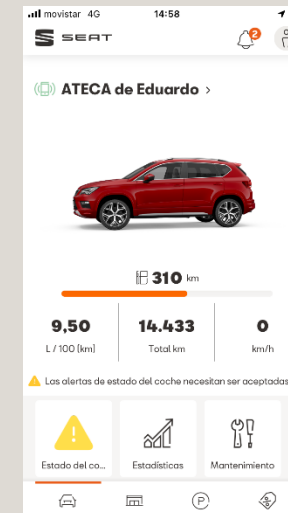

Thanks to this activation, every time that My SEAT App detects a problem with your vehicle's status, it will be able to warn you.

To do this, select the yellow icon that appears on the main screen (10).

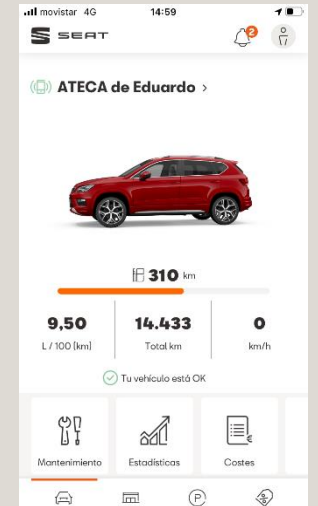

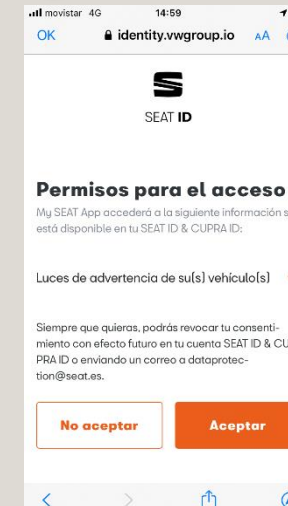

Read the permits and accept the conditions (11).

Congratulations, you are connected!
