**About this manual**

This manual contains information, recommendations, advice and warnings related to your radio system. The other publications in the vehicle documentation contain further information of which you should be aware for your own safety and for that of your passengers.

Ensure that the onboard documentation is kept in the vehicle at all times. This is especially important when lending or selling the vehicle to another person.

This manual contains a description of the equipment supplied with the vehicle at the time of press. Some of the units described herein will not be available until a later date or is only available in certain markets.

The illustrations are intended as a general guide and may vary from the equipment fitted in your vehicle in some details.

The screen colour and the colour of the information displayed on it can vary according to vehicle model.

**Directions and positions of components (e.g. right, left, front, rear)** are always relative to the direction of travel of the vehicle unless otherwise stated.

The audiovisual material only is intended to help users to understand certain car functionalities better. It does not replace the instruction manual. Please use the instruction manual to obtain more comprehensive information and indications.

- The equipment marked with an asterisk* is fitted as standard only in certain versions, and is only supplied as optional extras for some versions, or are only offered in certain countries.

- All registered marks are indicated with ®. Although the copyright symbol does not appear, it is a copyrighted mark.

The section is continued on the following page.

**Audiovisual material on a given page**

**WARNING**

Texts preceded by this symbol contain information on safety. They warn you about possible dangers of accident or injury.

**CAUTION**

Texts with this symbol draw your attention to potential sources of damage to your vehicle.

**For the sake of the environment**

Texts preceded by this symbol contain relevant information concerning environmental protection.

**Note**

Texts preceded by this symbol contain additional information.

## Introduction

### Safety instructions relating to the Infotainment system

Travelling on today's roads requires the driver's full attention at all times. Only operate the radio and its various functions when the traffic situation really permits this.

<table>
<thead>
<tr>
<th>WARNING</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Before starting the trip, you should familiarise yourself with the different radio functions.</strong></td>
</tr>
<tr>
<td><strong>High audio volume may represent a danger to you and to others.</strong></td>
</tr>
<tr>
<td><strong>Adjust the volume in a way that you can distinguish surrounding noise, for example, horns and sirens, etc.</strong></td>
</tr>
<tr>
<td><strong>Changes to the Infotainment system settings should be made when the car is stopped, or by a passenger.</strong></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>WARNING</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Distracting the driver in any way can lead to an accident and cause injuries. Operating the Infotainment system can distract your attention from the traffic.</strong></td>
</tr>
<tr>
<td><strong>Always drive carefully and responsibly.</strong></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>WARNING</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Select volume settings that allow you to easily hear signals from outside the vehicle at all times (e.g. emergency services sirens and horns).</strong></td>
</tr>
<tr>
<td><strong>Hearing may be impaired if using too high a volume setting, even if only for short periods of time.</strong></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>WARNING</th>
</tr>

<td><strong>Have CD or DVD players repaired only by a qualified workshop.</strong></td>
</tr>
</tbody>
</table>
Introduction

CAUTION
The Infotainment system can be damaged by the incorrect insertion of a data storage device or the insertion of an incompatible data storage device.

- When inserting a data storage device, make sure it is correctly positioned » page 23.
- Applying force may irreparably damage the memory card slot locking mechanism.
- Only use compatible memory cards.
- When inserting and removing CDs and DVDs, always hold them at right angles to the front of the CD/DVD drive without tilting so as not to scratch them.
- If a CD or DVD is inserted while another is already in the unit or being ejected, the DVD drive may be irreparably damaged. Always wait until the data medium is completely ejected.

CAUTION
Any foreign objects stuck to a data storage device and non-round media may damage the CD or DVD player.

- Only clean, standard 12 cm CDs or DVDs should be used.
  - Do not affix stickers or other items to the data medium. Stickers may peel off and damage the drive.
  - Do not use printable data media. Printed labels and coverings may peel off and damage the CD/DVD drive.

General instructions for use

Introduction

» table on page 2

If the setup is changed, this may change the display on the screen and in some cases, the Infotainment system may behave in a manner different to that described in this manual.

CAUTION
The vehicle loudspeakers may be damaged if the volume is too high or the sound is distorted.

- Do not insert 8 cm single CDs or irregularly shaped CDs or DVDs.
- Do not insert DVD-Plus discs, Dual Discs or Flip Discs, as these are thicker than normal CDs.

CAUTION
Any foreign objects stuck to a data storage device and non-round media may damage the CD or DVD player.

- Due to country-specific legislation, certain functions may not be available on the screen when the vehicle is travelling above a certain speed.
- Using a mobile telephone in the vehicle may cause noise from the vehicle loudspeakers.
- Restrictions on the use of devices using Bluetooth® technology may apply in some countries. For further information, contact the local authorities.
- On some vehicles with ParkPilot, the volume of the audio source is automatically lowered when reverse gear is selected. You can change settings for lowering the volume in the Sound setup menu » page 84.

Diagram of the menus

The Infotainment system touchscreen » Fig. 1 4 can be used to select the different main menus.

Press the infotainment MENU button » Fig. 1 1 to open the menu summary » page 4.

The display of the touchscreen’s main menu » Fig. 1 4 can be switched between “grid” and “carousel!” via the Settings menu » page 83.
**Introduction**

### Infotainment system rotary knobs and buttons

**Rotary/push knobs**

The rotary knob **Fig. 1** is the volume control and the on/off button.

**Infotainment buttons**

The buttons on the unit are shown in this manual with the words "Infotainment button" and its function within a rectangle, for example, **MENU** infotainment button.

The Infotainment buttons are used by pressing them or pressing and holding.

### Switch on and Switch off

To manually switch the Infotainment system on and off, briefly press the rotary knob **Fig. 1**.

When switching on, the system starts-up with the last set volume, provided that this does not exceed the preset maximum start-up volume **page 84, Sound and volume settings**.

The unit will switch off automatically when the key is removed from the ignition or when the on/off button is pressed (depending on the equipment fitted or the vehicle). If the Infotainment system is switched on again, it will switch off automatically after approximately 30 minutes (switch-off delay).

#### Note

- The Infotainment system is a part of the vehicle. It cannot be used in any other vehicle.
- If the battery has been disconnected, the ignition must be activated before switching on the Infotainment system.

### Change base volume

#### Increasing or decreasing the volume or muting the sound

**Increasing the volume**: Turn the volume control clockwise or move the left thumbwheel on the multifunction steering wheel upward **Booklet Instruction Manual**.

**Lowering the volume**: Turn the volume control anti-clockwise or move the left thumbwheel on the multifunction steering wheel downward **Booklet Instruction Manual**.

Changes in volume are indicated by a volume bar on the screen. The volume can be controlled using the steering wheel controls. In this case, the changes in volume are displayed on the instrument panel by a volume bar.

It is possible to preset certain volume settings and adjustments **page 84, Sound and volume settings**.

#### Muting the Infotainment system sound

**Note**

- Turn the volume control anti-clockwise until it displays 

Muting the Infotainment system sound stops the media source that is playing. The screen displays 

#### Note

If the base volume has been considerably increased to play a certain audio source, lower the volume again before switching to another audio source.
Introduction

Operation of the function buttons and the instructions on the screen

These buttons are operated by briefly pressing the screen or by pressing and holding.

The function buttons appear in the instructions with the label “function button” and a button symbol (inside a rectangle).

Function buttons start functions or open sub-menus. The currently selected menu is displayed in the title bar » Fig. 3 (B) of the sub-menus.

Inactive (grey) function buttons cannot be selected.

Increase or decrease the size of the images displayed on the screen

The size of the navigation map image » page 42 and, for example, photos when viewing images » page 23 can be enlarged or reduced. To do so, enlarge or reduce the image displayed by moving two fingers.

Overview of screen and function buttons

The Infotainment system comes equipped with a touchscreen » page 3 (A).

Active areas of the screen that call up a certain function are called “function buttons”. The title bar shows the selected menu and, where applicable, other function buttons.

Press it to open another menu.

Display and function buttons: operation and effect

- The scroll bar is shown on the right and its size depends on the entries in the list. Move the bar on the screen by pressing lightly and without lifting the finger, see » page 10, Open list entries and search lists.

- Movable cursor: Move the cursor around the screen by pressing lightly and without lifting the finger.

  OR: To move the cursor to a particular position, press that spot on the screen.

- Fixed crosshair: Press the up, down, left and right arrows to move the sound according to preference. The cursor (D) will move.

  OR: Press the central button to centre the stereo sound in the centre of the passenger compartment

- Press it on some lists to move up a level, one by one.

- BACK Press to return from the submenus one at a time to the main menu or to undo the entries made.

- When pressed, a pop-up window opens (options window) which displays other setup options.

- Some functions or messages are accompanied by a check box and are activated ☑ or deactivated ☐ by pressing said check box.

- Press to confirm an entry or a selection.
Introduction

Display and function buttons: operation and effect

- Press the setup button to activate the marked entry on the list.

Search lists (scrolling the screen)
The scroll bar is shown on the right and its size depends on the entries in the list >>> Fig. 5 1.

- Briefly press the screen above or below the scroll marker.
- OR: Place a finger over the scroll marker and without lifting it, move it around the screen. Lift your finger off the screen when you reach the desired position.
- OR: Place your finger in the center of the screen and without lifting it, move it around the screen. Lift your finger off the screen when you reach the desired position.

Open list entries and search lists

The entries on a list can be activated by pressing them on the screen directly.

Mark list entries using the setup button and open them

- Turn the setup button to mark the entries on the list with a rectangle one by one and continue searching the list in this manner.

Input windows with on-screen keypad

Input windows with on-screen keypad are used for functions such as entering an entry name, selecting a destination address or entering a search term for searching long lists.

The function buttons listed below are not available in all countries or for all topics.

Subsequent chapters only explain those functions that differ from those in the screen shown in the figure.

The input line with cursor is located in the top bar of the screen. All inputs are displayed here.

Input windows for “free text input”

In the input masks for open text, you may enter letters, numbers and special characters in any combination.

Input windows for selecting a saved entry (e.g. selection of a destination address)

It is only possible to select a sequence of letters, numbers and special characters that matches a stored entry.

Suggestions for matching destinations appear depending on the characters entered in the input line >>> Fig. 6 4. In the case of compound names, it is necessary to enter a space.

If there are fewer than 99 selectable entries, the number of remaining entries is displayed after the input line 3. Pressing this function...
button displays these remaining entries in a list.

**Overview of the function buttons**

</tr>
</tbody>
</table>

**Additional displays and display options**

The displays appearing on the screen may vary depending on the settings, and may differ from those described here.

The status bar on the screen can display, for example, the current time and outside temperature.

All displays can be viewed only after completely restarting the Infotainment system.

**Initial configuration wizard**

Fig. 7 Initial configuration wizard

The initial configuration wizard will help you to set up your Infotainment system the first time you switch it on.

Every time you switch on the Infotainment system, the initial setup screen will appear...
Introduction

</tbody>
</table>

Operation

Many radio, media, telephone and navigation functions may be performed through voice commands.

The Infotainment system’s voice control will only be available for the language selected in System setup ➢ page 83.

Setup of voice control ➢ page 14.

Start and stop the voice control

- To activate the voice control, briefly press the button on the multi-function steering wheel ⚫.
- When you activate voice control, a tone will be heard for the start of the dialogue and the voice control main screen will be displayed.

➢ Fig. 8, (the main screen will appear in the format selected in Voice control settings ➢ page 14). The spoken instructions will guide you through the following “dialogue”.

- Pronounce the desired order and follow the instructions of the “dialogue”. A function can often be activated with different spoken commands. If in doubt, try giving a command or say Help.
- When an action is performed (e.g. calling a contact), the voice control automatically deactivates and must be reactivated again when needed. There are certain commands after which the voice control does not end and waits with What do you wish to do now?.

- To finish voice control manually, either press and hold the ⚫ button on the multifunction steering wheel until the corresponding confirmation signal is heard, or give two quick presses on the ⚫ button on the steering wheel, or press the function button in the top right corner of the screen.

Help with voice control

Listening to Help when using voice control for the first time is recommended.

- Switch on the speech control system ⚫.
Introduction

• Give the Help command in the language established in the System setup, and follow the dialogue instructions. The Help command can also be spoken followed by the infotainment system function, for example, “Help with the navigation”.

Interaction with the dialogue mode
Icons in the top left corner:

○ The system is expecting a command from the user.
 The system has recognised a command and will act shortly.
 The system is in pause mode. (max. 3 minutes).
△ / ▽ Hide or show the voice control menu ➔ page 14.

Operation during the dialogue
While the infotainment system transmits a spoken indication, the display will show the symbol .

• The announcement can be stopped by pressing the upper left icon on the screen or the  button on the steering wheel and voice recognition for the user will resume.

IMPORTANT: The system will ONLY recognise a command when the  symbol is displayed as “active” on the display or touch screen.

If you make a mistake when giving a command or give an incomplete command, and it has no effect, you can repeat the command. The symbol  remains active.

• Briefly press the  button to repeat the command.

Instructions for voice control
For optimum functioning of the voice control, follow these instructions:

• Speak slowly and clearly, as far as possible. The system will not recognise words that are not pronounced clearly, or words and figures in which syllables are omitted.
• Telephone numbers must be given digit by digit or in blocks of numbers in ones, tens or hundreds.
• Speak at a normal volume, without exaggerated intonation or long pauses.
• Avoid noise from the exterior and nearby (for example, conversations inside the vehicle). Close all doors, windows and the sliding roof.
• Do not aim the air from the diffusers at the roof of the passenger compartment.
• If you are driving very fast, speak a little louder.

When you activate voice control you are taken to the main screen ➔ Fig. 8 where the main commands and the modes in which system works are shown.

From here, you can tell the system which mode you want to activate or directly give a voice command.

When you select any of the modes (Navigation, Telephone, Radio, Media, Voice control) a menu will appear listing the main commands and, in each one, brief explanations to help understand how they work.

Voice control (RADIO)

</tbody>
</table>

Note

- The availability of AM and DAB bands depends on the country and/or equipment. In the event that the AM and DAB bands are not available, the BAND function button text will not be shown.
- Bear in mind that being underground, in tunnels, in areas with tall buildings or mountains can interfere with radio signals.
- Foil or metal-coated stickers attached to the windows may affect reception on vehicles with a window aerial.
RDS radio data services (FM band)

The RDS (Radio Data System) offers additional information in FM such as the visualisation of the station name, automatic station tracking (Alternative Frequencies AF), text emitted by radio (Radio Text), traffic reports (TP) and station types (PTY).

Due to matters of infrastructure, RDS functions may be limited in certain countries, and you may not be able to receive traffic announcements, automatic station tracking (AF) or programme types (PTY).

Depending on the country and the unit in question, the RDS can be deactivated in the FM setup menu ➔ page 21.

Without RDS it is not possible to use radio data services.

Name of the station and automatic station tracking

If equipped with the RDS function, the names of the stations can be displayed in the main RADIO menu and in the FM station list. FM radio stations may occasionally or continuously broadcast different content on different regional frequencies under the same station name (e.g. Station 3).

By default, automatic station tracking always switches to the currently selected station's frequency that offers the best reception, as the vehicle travels from one area to the next. As a result, this may cause the regional signal to be lost.

Automatic frequency changing and automatic station tracking can be deactivated in FM setup ➔ page 21.

Set a station name

In some cases the name of the station is too long. This text may be blocked/unblocked by pressing on the station name for 3 seconds until hearing an audible signal (a dot will appear/disappear on the left and right of the station name).

Radio text

Some RDS-enabled stations also broadcast additional text information known as radio text.

Radio Text is displayed in the upper half of the screen above the memory buttons ➔ Fig. 9 A.

The Radio Text display can be deactivated in FM setup ➔ page 21.

Station list order

Stations that are available at a certain time are displayed on the station list screen (STATION LIST function button). This list may be arranged by station group, by genre or alphabetically ➔ Fig. 11.

Note

Radio stations are responsible for the content of the information they transmit.

1) Depends on the market and unit in question.
Audio and Media Mode

Digital radio mode (DAB, DAB+ and audio DMB)*

In Europe, digital radio is transmitted via Band III frequencies (174 MHz to 240 MHz) and the L Band (1452 MHz to 1492 MHz).

The frequencies of the two bands are referred to as “channels” and each has a channel name (e.g. 12 A).

Several available DAB stations are combined into one channel in an “ensemble”.

Starting Digital radio mode

• From the RADIO main menu press the BAND function button and select DAB.

The DAB radio station that was last selected will be played if it can still be received at the current location.

The selected DAB station is displayed in the upper bar of the screen; the group of selected stations is displayed below Fig. 12.

Additional DAB stations (Secondary Service Components)

Some DAB stations temporarily or permanently offer additional stations, (for example, for broadcasting sports events).

DAB stations containing additional stations are identified in the station list by means of the symbol ▶.

Selecting additional stations

<table>
<thead>
<tr>
<th>From the main screen</th>
<th>Press the name of the main station</th>
</tr>
</thead>
<tbody>
<tr>
<td>Press the memory button of the main station</td>
<td></td>
</tr>
</tbody>
</table>

From the station list | Select the additional station from the list |

The DAB main menu shows the name of the additional selected station on the right alongside the abbreviated name of the main DAB station.

The additional stations cannot be stored.

Automatic station tracking

DAB is currently not available in all areas. In areas without DAB, ★ is displayed in DAB radio mode.

If reception of the currently selected DAB station is lost (e.g. no DAB reception available), the infotainment system attempts to find the station and tune to it on the other available frequency bands. If the station still cannot be found, the radio will be muted. Automatic station tracking can be activated in the DAB settings in the following modes page 22:

• DAB - DAB station tracking: The radio attempts to tune to the same station on an alternative DAB frequency. Automatic station tracking only works if both DAB stations transmit the same station identifier or the...
Audio and Media Mode

DAB signal indicates the other corresponding DAB station.

- **Automatic DAB - FM switching:** The radio attempts to tune to the same station on the FM frequency band. Automatic station tracking between frequency bands only works if both the DAB station and the FM station transmit the same station identifier or the DAB signal indicates a corresponding station on the FM frequency band. Once the corresponding FM station has been found, “FM” is displayed after the station name. When reception for the corresponding DAB station returns, after a short time the unit will switch back to DAB mode and “FM” will no longer be displayed.

- **Switch to a similar station:** This allows service providers to indicate alternative stations with similar content. This way, if the radio loses reception of a DAB station and cannot find an alternative frequency for it on FM or DAB, there is a possibility of tuning in to a station with similar content.

**Radio text**

Some stations also broadcast additional text information known as radio text.

Radio text is displayed either in the upper half of the screen above the memory buttons [Fig. 12](#) or in the screens Station information or Radio text, via the Screen view menu [page 18](#).

The radio text display can be deactivated in DAB settings [page 22](#).

**Slide show**

Some stations broadcast images for additional visual information.

These images are displayed as a slide show in the screens Station information or Slide show, via the Screen view menu [page 18](#).

The slide show can be displayed in full screen by pressing on the current image.

**Screen view menu**

The function buttons refer to the menu that appears when the View button is pressed [Fig. 12](#).

- **Preset list:** Memory buttons display [Fig. 12](#).
- **Station information:** Simultaneous displaying of radio text and slide shows instead of the memory buttons [Fig. 13](#).
- **Radio text:** Radio text is displayed instead of memory buttons.
- **Presentation:** The slideshows are displayed in full screen.

**Note**

- Not all DAB stations broadcast radio text and slide shows.

**Memory buttons**

The stations of the currently selected frequency range can be stored on the numbered function buttons in the RADIO main menu. These function buttons are called “memory buttons”.

**Functions of the memory buttons**

- Selecting the station from the memory buttons
- Press the memory button corresponding to the desired station.
- The stored stations can only be played by pressing the corresponding memory button provided it can be received at your current location.
## Audio and Media Mode

### Functions of the memory buttons

<table>
<thead>
<tr>
<th>Function</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Switching between memory banks</td>
<td>Move your finger over the screen from left to right or vice-versa. OR: Press one of the function buttons ➞ Fig. 14 (A) The memory buttons are displayed in three memory banks.</td>
</tr>
<tr>
<td>Storing the station on the memory buttons</td>
<td>See: Storing stations ➞ page 20.</td>
</tr>
<tr>
<td>Storing the station logo on the memory buttons</td>
<td>A station logo can be assigned to the stations stored on the memory buttons ➞ page 19.</td>
</tr>
</tbody>
</table>

### Storing station logos

**Store automatically (only in FM and DAB mode)**

When a station is stored the station logo is automatically assigned.

If there are 2 or more logos in the database, it gives the option to choose the correct one.

**Store manually**

The station logos can be imported from a compatible data medium (for example, memory card or memories with USB port).

### Select, tune and store stations

**Selecting stations**

- Press the function button Setup and then Station logos.
- Press the station button where you wish to store the logo of a station.
- Select the source where the logo is stored (for example, SD card 1). We recommend saving logos in the memory unit’s root directory.
- Select the station logo.
- Repeat the process to assign other logos; press the (MENU) infotainment button ➞ Fig. 1 (1) and then select the RADIO context to return to the RADIO main menu.
- If you wish to change the logo of a memory button that already has one assigned to it, it must first be deleted from the button in question.

**Selecting stations from the station list**

Press the (Station) ➞ Fig. 9 function button to open the station list.

Search through the list and press the required station to select it.

To close the station list, press the BACK button ➞ Fig. 10. The station list closes automatically after a period of inactivity.

**Manually tuning in a station frequency.**

- **Viewing the frequency dial**
  - Press the (Manual) function button ➞ Fig. 9.
  - Turn the adjustment knob.
  - OR: Press the + or – keys on the dial that appears on the screen.

- **Changing the frequency in steps**
  - Press and hold one of the arrow buttons on the left of the multifunction steering wheel. After releasing the arrow button, the unit automatically tunes to the next available radio station.
  - OR: Place your finger on the slider in the frequency range and drag it to move the button.

- **Browsing the frequency band quickly**
  - Manual frequency selection is also closed if you select a station with a memory button. If no operation is performed, the frequency range will disappear after a period of inactivity.
Audio and Media Mode

### Storing stations

**Storing the station that is currently being listened to.**

Press and hold the desired memory button [Fig. 9] until an audible signal is heard.

The station tuned in will be stored on this memory button.

**Storing a station on the list of stations**

Press the Station [Fig. 9] function button to open the station list.

The stations that are already stored on a memory button are marked on the station list with the symbol [Fig. 10].

Select the desired station by pressing and holding it on the screen. A screen will appear to store the station on the memory buttons.

Press the memory button where the station is to be stored.

An audible signal is heard and the station is stored on the memory button. To continue storing other stations from the list, repeat the process.

**Deleting stored stations**

All the stored stations can be deleted together or separately from the FM, AM, DAB Setup menu [page 21].

### Scan function

When the scan function is active, all available stations on the current frequency band are played in sequence for approximately 5 seconds each.

### Starting and stopping the scan function

<table>
<thead>
<tr>
<th>Starting the scan function</th>
<th>Stopping the scan function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Press the Settings function button and then select SCAN.</td>
<td>Press the SCAN function button to stop the scan function at the station that is currently playing.</td>
</tr>
<tr>
<td>Manually selecting a station with the memory buttons or changing the screen also stops the scan function.</td>
<td></td>
</tr>
</tbody>
</table>

### Traffic news (TP)

Traffic news monitoring with the TP function is only possible when a traffic news station is available. Stations with a traffic news function are accompanied on the RADIO main menu by a TP indicator [Fig. 9] and [Fig. 10].

Some stations that do not broadcast their own traffic news support the TP function by broadcasting traffic reports by other stations (EON).

### Switching the TP function on and off

- Using the Setup (FM, AM, DAB) menu, activate [ ] or deactivate [ ] the Traffic station (TP) by pressing it [page 21].

### Active TP function and station selection

While traffic news monitoring is activated, the letters TP will be displayed on the left-hand side, halfway down the screen while in Audio mode [Fig. 9]. Traffic announcements broadcast by the current station or a linked traffic news station will interrupt the current audio mode.

In FM mode, the selected station must support the TP function.

If a station is selected without the TP function, the radio tries to find stations with this function in the background. If no station is found, this will be indicated half way up the left of the screen [TP].

In AM mode or media mode, the unit will always automatically tune to a traffic news station in the background, provided a TP station is available. This procedure may take some time, depending on the situation.

### Incoming traffic announcement

In active Audio mode, an incoming traffic announcement will play automatically.

During the traffic announcement, a pop-up window is displayed and the radio changes,
depending on the case, to the traffic news station (EON).

The media mode is paused and the volume is adjusted to the preset level \( \textit{page 84} \).

The volume of the traffic announcement can be modified with the volume control \( \textit{O} \). The adjusted volume setting will be applied to subsequent announcements.

- Press the \( \text{Cancel} \) function button to end the current traffic announcement. The TP function remains switched on.
- \( \text{OR:} \) Press the \( \text{Deactivate} \) function button to end the traffic announcement and disconnect the TP function permanently.

**Setup (FM, AM, DAB)**

**FM setup**

Select the FM frequency band by pressing the \( \text{MENU} \) infotainment button \( \textit{Fig. 1} \) and then select the Radio context.

**OR:** Press the \( \text{BAND} \) function button and select the FM frequency band.

Press the \( \text{SETUP} \) function button to open the FM Settings menu.

**Function button: function**

- **Sound:** Sound settings \( \textit{page 84} \).
### Function button: function

<table>
<thead>
<tr>
<th><strong>Sound</strong>: Sound settings</th>
<th><strong>Seek mode</strong>: To adjust settings for the buttons with the arrows ▼ and ▲. This setting applies to all frequency bands (FM, AM and DAB).</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Preset list</strong>: All stored stations on the selected frequency band can be browsed with the arrow buttons.</td>
<td><strong>Station list</strong>: All available stations on the selected frequency band can be browsed with the arrow buttons.</td>
</tr>
<tr>
<td><strong>Scan</strong>: Scan function. When the scan function is active, all available stations on the current frequency band are played in sequence for approximately 5 seconds each</td>
<td><strong>Traffic news station (TP)</strong>: The TP function (traffic news station tracking) is active.</td>
</tr>
<tr>
<td><strong>Delete presets</strong>: To delete all or some of the stored stations.</td>
<td><strong>Delete presets</strong>: To delete all or some of the stored stations.</td>
</tr>
<tr>
<td><strong>Station logos</strong>: To assign the logos to the stations stored on the memory buttons</td>
<td><strong>Radio text</strong>: Radio Text is active.</td>
</tr>
</tbody>
</table>

### DAB Settings

Select the DAB frequency band by pressing the [MENU] infotainment button [1] and then select the Radio context.

**OR:** Press the [BAND] function button and select the DAB frequency band.

Press the [SETUP] function button to open the DAB Settings menu.

### Advanced setup

- **Auto-save station logos**: The station logos are automatically assigned when the radio stations are stored to the memory buttons.
- **DAB traffic announcements**: DAB traffic announcements are played in the same way as TP traffic announcements in all operating modes.

### Other DAB alerts

- **Other DAB alerts**: DAB announcements (news, sport, weather, warnings etc.) will interrupt the current DAB radio mode.
- **DAB-DAB station tracking**: automatic station tracking within the DAB frequency range is activated.
- **DAB-FM Automatic switching**: switching to FM frequency band is allowed for automatic station tracking.
- **Switch to a similar station**: this allows service providers to indicate alternative stations with similar content.
- **L-band**: L-band is activated (low-range station frequencies for local reception).

*a) Only available for the model: “Navi System Plus”*
Audio and Media Mode

Media mode

Introduction

“Media sources” are audio sources containing audio files on various different data storage devices (e.g. CD, memory card, external MP3 player). These audio files can be played by the Infotainment system via their corresponding drives or audio input sockets (internal CD drive, memory card slot, AUX-IN multi-media socket etc.).

Copyright

Audio and video files on data storage devices are usually protected by intellectual property rights, as per the corresponding national and international laws. Be aware of the current legal provisions!

Note

- MPEG-4 HE-AAC audio coding technology and patents are licensed from Fraunhofer IIS.
- This product is subject to certain intellectual property rights and copyrights owned by the Microsoft Corporation. The use or distribution of this type of technology outside this product requires a licence from Microsoft or an authorised Microsoft company.
- The Infotainment system only plays undamaged compatible audio files; other files are ignored.
- Consult the list of supported devices on the SEAT website.

Requirements for data storage devices and files

Factory-fitted CD and DVD drives conform to safety class 1 according to DIN IEC 76 (CO) 6/ VDE 0837.

The Infotainment system only accepts standard 12 cm CDs/DVDs and memory cards with these dimensions: 32 mm x 24 mm x 2.1 mm or 1.4 mm.

The supported file formats listed are collectively referred to below as “audio files”. A CD containing audio files of these types is referred to as an “audio data CD.”

The Infotainment system only plays undamaged compatible audio files; other files are ignored.

Consult the list of supported devices on the SEAT website.
## Audio and Media Mode

**Valid for the model: Navi System Plus**

---

The external audio source must meet a series of playback conditions. The external audio source must meet a series of playback conditions.
## Audio and Media Mode

**Valid for the model: Media System Plus/Navi System**

### Data storage device

- **Optical discs:**
  - audio CD (up to 80 min).
  - CD-ROM, CD-R, CD-RW with audio data up to a maximum of 700 MB (megabytes) using ISO 9660 Level 1 and 2, Joliet or UDF 1.02, 1.5, 2.01 file system.

- **Memory cards:**
  - SD and MMC in the file system must be FAT12, FAT16, FAT32 or VFAT (max. 2 GB).
  - SDHC (max. 32 GB) and SDXC (max. 2 TB (terabytes) in exFAT and NTFS file systems.

- **USB data storage device:**
  - Devices compliant with USB 2.0 and 3.0 specifications.
  - FAT16, FAT32, exFAT and NTFS file systems.
  - iPods™, iPads™ and iPhones™ of various generations.
  - MTP players with the “PlaysForSure” or “ReadyForVista” logo.

### Audio files

- **Requirements for playing in the unit**
  - Digital Audio specification.
  - MP2 (.mp2) and MP3 (.mp3) files with bit rates of between 32 and 320 kbit/s or variable bit rate.
  - WAV (.wav) files.
  - WMA (.wma) files up to 10 mono/stereo without copy protection and bit rates of up to 384 kbit/s.
  - AAC (.m4a, .m4b and .aac) files without copy protection
  - OGG-Vorbis 1 (.ogg) files with bit rates of up to 256 kbit/s.
  - FLAC (.flac) files.
  - Playlists in the formats M3U, PLS, ASX and WPL.
  - Playlists must not exceed 20 kB or have more than 1000 entries.
  - Filenames and paths that do not exceed 256 characters.
  - For memory cards, a maximum of 4000 files and a maximum of 1000 files per directory.

### AUX

- Playing audio files via the AUX-IN socket.

### Audio file playback via Bluetooth®

- The external audio source must meet a series of playback conditions [page 34].

- The external media player must be compatible with the A2DP Bluetooth® profile [page 34].

---

**Restrictions and instructions**

Contamination, exposure to high temperatures and mechanical damage may render a data medium unusable. Please observe the manufacturer’s instructions.

Variations in the quality of data media produced by different manufacturers can lead to problems during playback.

Please observe copyright laws.
Audio and Media Mode

The unit may be unable to read individual tracks or the entire data medium due to the data medium configuration or the devices and programs used for recording. Information about the best ways to create audio files and data media (compression rate, ID3 tag etc.) can be found on the Internet.

The reading time may vary considerably depending on the condition of the data medium (copying and deleting actions), folder structure and file type.

**Playlists** only determine a certain playing order. There are **no** files stored in a playlist. The unit will **not** play a playlist if the files are **not** stored on the data medium at the locations referred to by the playlist (relative file paths).

A cover can only be displayed when the name starts with **“Cover”**, **“Folder”** or **“Album”**.

### Playing order of files and folders

The image shows a standard CD with audio data which contains tracks □, folders □ and subfolders » Fig. 15.

In this case, the tracks are played in this manner:

1. Tracks ① and ② in the CD’s root directory
2. Tracks ③ and ④ in the **first** folder F1 in the CD’s root directory
3. Track ⑤ in the **first** subfolder F1.1 of the folder F1
4. Track ⑥ in the **first** subfolder F1.1.1 of the subfolder F1.1
5. Track ⑦ in the **second** subfolder F1.2 of the folder F1
6. Tracks ⑧ and ⑨ in the **second** folder F2

**Note**

- Do not use memory card adapters.
- SEAT assumes no liability for any deterioration or loss of files on data storage devices.

---

1) In the **Media Settings** menu, the Mix/Repeat including subfolders function must be activated » page 39.

The audio files □ stored on data storage devices are often organised by means of folders □ and playlists □ to determine a certain playing order.

Tracks, folders and playlists on a data storage device are sorted by name in alphanumerical order.
Audio and Media Mode

**MEDIA main menu**

Using the MEDIA main menu, different media sources can be selected and played.

- Press the [MENU] infotainment button [✓ Fig. 1](#) and then select the Media context to open the MEDIA main menu [✓ Fig. 16](#).

It will continue playing the last media source selected from the same point.

The media source being played is indicated on the dropdown list when pressing the [SOURCE] function button [✓ Fig. 16](#).

If there is no available media source, the MEDIA main menu is displayed.

<td>Displays information about the artist name, album name and song title (CD text (\text{CD} \cap) ID3 tag on compressed audio files). Audio CD: displays track information if available via Gracenote(^\text{a)}). If no data is available, it only displays Track and the number corresponding to the position it occupies on the data storage device.</td>
</tr>
<tr>
<td>B</td>
<td>Viewing the album cover: If there are various covers within the same folder/album, the system only displays one of them. It prioritizes displaying the covers in the following manner: 1. Cover embedded in the file(s). 2. Image in file folder. 3. Image provided by the Gracenote(^\text{a)}) database. 4. Default icon for the connected device. If playing a video file, by pressing the icon (cover) it can be played on full screen.</td>
</tr>
<tr>
<td>C</td>
<td>The playing time so far and time remaining in minutes and seconds. In the case of audio files with variable bit rates (VBR) the remaining time may vary.</td>
</tr>
<tr>
<td>RDS Off(^\text{a)})</td>
<td>The RDS radio data service is deactivated. The RDS can be activated in the FM setup menu (\Rightarrow) page 21.</td>
</tr>
<tr>
<td>TP(^\text{b)})</td>
<td>The TP function is active and can be tuned in (\Rightarrow) page 20.</td>
</tr>
</tbody>
</table>

Note

- When the media source is inserted, playing will not start automatically; it is necessary for the user to select the source. Nor will the media source change when it is ejected.
- In order to see the different covers inside of the same album/folder, make sure that the tracks contain different information about the Artist or Album in its metadata. If not, you will see the same cover for all of tracks contained in the same album/folder.

Display: Meaning

- There is no traffic news station available \(\Rightarrow\) page 20.
- DAB not available \(\Rightarrow\) page 17.

\(^a\) Gracenote\(^\text{®}\) is a database available on the Infotainment system hard drive that contains information on the tracks of different artists and albums. In order for the user to benefit from the functions offered by Gracenote\(^\text{®}\), the tracks must contain the artist and/or album data (only available for the model: “Navi System Plus”).

\(^b\) Depends on the market and unit in question.

Change the media source

- From the MEDIA main menu, press the source function button \(\Rightarrow\) Fig. 17 and select the desired media source.

In the pop-up window, the Media sources not selected are shown as deactivated (in grey).

When a Media source that has already been played is selected again, playback is resumed from the point at which it was stopped.

Optionally selectable media playback sources

Audio and Media Mode

Selecting an album by its cover

[Image]

When pressing the current cover [Fig. 18 1], it displays all the album covers available in the active media source. [Fig. 19].

It is possible to browse through all the albums by sliding the covers left or right or by using the bottom horizontal slide bar.

The selection by cover view will close after approximately 5 seconds of inactivity and will return to the main Media menu.

Selection of a track from a list of tracks

[Image]

Opening a track list

- From the MEDIA main menu, press the SELECTION [Fig. 18] function button to open the track list. The track that is currently playing is highlighted [Fig. 21].
  - Search through the track list and press the desired track.

If there is information available on the track, the track is displayed (for audio CDs) or the name of the file (MP3), rather than Track + number.

Overview of the function buttons on the track list

<table>
<thead>
<tr>
<th>Function button: function</th>

</thead>
<tbody>
<tr>
<td>A</td>
</tr>
<tr>
<td>Open the Sources menu. Select another media source by pressing.</td>
</tr>
</tbody>
</table>
**Audio and Media Mode**

**Function button: function**

- Indicates the media source being explored. If pressed it goes to the root folder of the device indicated on the icon.

  - **JUKEBOX**: Internal hard drive of the Information system (SSD) – page 35.
  - **CD/DVD**: Internal CD and DVD drive – page 32.
  - **SD CARD 1, SD CARD 2**: SD memory card – page 32.
  - **USB 1, USB 2**: External data storage device connected to the USB port – page 33.
  - **BT AUDIO**: External media player connected by Bluetooth – page 34.
  - **AUX**: Audio source connected to the AUX-IN socket – page 34.
  - **WLAN**: External audio source connected by WLAN – page 37.

- Press the function button to open the top folder of the media source.

- Starts playback of the first track.

**Function button: function**

- Repeat all tracks.

  - Repeats all the tracks that are on the same memory level as the track being played at that moment. If in the Media Settings menu **Mix/Repeat including subfolders** is activated, it also includes the subfolders – page 39.

- Random play.

  - Includes all the tracks that are on the same memory level as the track being played at that moment. If in the Media Settings menu **Mix/Repeat including subfolders** is activated, it also includes the subfolders – page 39.

- To close the track list.

  - **CLOSE**: Only available for the model: “Navi System Plus”.

  - The DVD drive is only available for the model: “Navi System Plus”.

**Note**

The tracks, folders and playlists can also be selected by turning the setup button, and can be played or opened by pressing it.

**Database view**

From the track list, press the **Show database view** option. The content of the current Media source will be displayed classified by **Playlists, Artists, Albums, Musical genres, Tracks and Videos** – Fig. 20.

When selecting one of the **Artists, Albums** or **Tracks** folders, a search button appears in the top right (magnifying glass) which allows a search to be carried out in the selected category – page 10, Input masks with on-screen keypad.

To return to the folder view, press the **Show folder view** option from the **SELECTION** Menu.
Audio and Media Mode

Insert or eject a CD or DVD

1) The DVD drive is only available for the model: “Navi System Plus”.

1) Insert or eject a CD or DVD

The driver should refrain from operating the unit while the vehicle is in motion. Insert or change the data storage device before moving off!

The CD and DVD drive can play audio CDs and DVDs and audio data CDs and DVDs.

Insert a CD or DVD

- Hold the CD or DVD with the printed side facing up.
- Push the CD or DVD into the DVD slot Fig. 23 3 to the point where it is drawn in automatically.

Eject a CD or DVD

- Press button 1.
- The CD or DVD in the drive will be ejected and must be removed within approximately 10 seconds.

If the CD or DVD is not removed within the 10 seconds, it is automatically retracted for security reasons without activating the CD or DVD mode.

Unreadable or defective CD or DVD

If the data on an inserted CD or DVD cannot be read or a faulty CD or DVD is inserted, the corresponding warning appears on screen.

Depending on the unit, unreadable CDs or DVDs are ejected 3 times automatically and inserted again to initiate another three attempts before said message is displayed.

Note

- Uneven road surfaces and strong vibrations can cause playback to jump.
- When the temperature inside the unit is too high, loading and playback of CDs and DVDs is disabled.
- If after inserting a number of different CDs or DVDs and receiving the CD drive error every time, contact a qualified workshop.

Insert or eject a memory card

Depending on the features and the country, the vehicle may have one or two slots for SD cards.

Inserting a memory card

Insert the compatible memory card, bevelled edge first and with the label face up (contacts face down), into slot Fig. 23 2, until properly inserted.

If a memory card cannot be inserted, make sure it is positioned correctly and is compatible with the unit.

Removing a memory card

The inserted memory cards must be prepared for removal.

- From the main Media menu, press the SETTINGS button to open the Media Settings menu or press the MENU infotainment button Fig. 1 1 and then select the Settings context to open the System settings menu.
- Press the Remove safely function button. A dropdown menu appears with the following options: SD card 1, SD card 2*, USB 1 and USB 2*. After correctly ejecting the memory...
Audio and Media Mode

card from the system, the function button becomes inactive (grey colour).

● Press the inserted memory card. The memory card “jumps” to the eject position.
● Remove the memory card.

Unreadable memory card

If a memory card is inserted and the data cannot be read, the relevant warning appears.

External data storage device connected to USB port

Depending on the features and the country, the vehicle may have one or two USB connections. For their location consult the Booklet Instruction Manual.

Audio files on an external data storage device connected to the USB port can be played and controlled via the Infotainment system.

Where this manual refers to external data storage devices, this means USB mass storage devices containing supported audio files, such as MP3 players, iPods™ and USB sticks.

Only supported audio files are displayed and played. Other files are ignored.

Further operation of the external data medium (changing track, selecting tracks and playback modes) is described in the appropriate chapters of this manual ➔ page 23.

Instructions and restrictions

Compatibility with Apple™ devices and other media players depends on the unit.

The USB port supplies the usual USB voltage of 5 volts for a USB connection.

External hard disks with a capacity greater than 32 GB must be reformatted for the FAT32 file system in some circumstances. You will find the necessary software and information on the Internet.

Take into account all other instructions and limitations regarding requirements for media sources ➔ page 23.

iPod™, iPad™ and iPhone™

Depending on the country and the equipment, iPods™, iPads™ or iPhones™ can be connected using the device’s USB cable to the USB port of the vehicle and used as audio sources.

After connecting an iPod™, iPad™ or iPhone™, the specific list views of the iPod are displayed in the upper selection level ( Playlists,  Artists,  Albums,  Tracks,  Podcasts etc.).

Possible error messages after connecting an external data storage device

<table>
<thead>
<tr>
<th>Error message</th>
<th>Cause</th>
<th>Procedure</th>
</tr>
</thead>
<tbody>
<tr>
<td>The device is not compatible</td>
<td>The external data carrier cannot be played or communication is not possible with the adapter cable being used.</td>
<td>Check the connection and make sure the external data medium is working correctly. If possible, update the data storage device software.</td>
</tr>
<tr>
<td>The device does not work</td>
<td>Communication fault.</td>
<td>Check the connection and make sure the external data medium is working correctly.</td>
</tr>
</tbody>
</table>

Due to the large number of different data storage devices and various iPod™, iPad™ and iPhone™ generations available, it is not possible to guarantee fault-free operation of all functions described here.

Disconnecting

Any connected data storage devices must be prepared before their disconnection in order to remove them.

● From the main Media menu, press the SETTINGS button to open the Media Settings menu or press the MENU infotainment button ➔ Fig. 1 and then select the Settings context to open the System settings menu.
Audio and Media Mode

- Press the [Remove safely] function button. A dropdown menu appears with the following options: SD card 1, SD card 2*, USB 1 and USB 2*. After correctly ejecting the data storage device from the system, the function button becomes inactive (grey colour).
- Now the data storage device can be disconnected.

Note
- Do not connect an external media player at the same time to play music via Bluetooth® and via the USB port with the Infotainment system, as this could cause playback limitations.
- If the external player is an Apple device™, it cannot be simultaneously connected by USB and by Bluetooth.
- If a connected device is not recognised, disconnect all the connected devices and try connecting the device again.
- Do not use memory card adaptors, USB extension cords or USB hubs!

External audio source connected to the AUX-IN multimedia socket

Depending on the equipment and country there may be an AUX-IN multimedia socket. Please read and observe the manufacturer’s instruction manual for the external audio source.

In order to connect the external audio source to the AUX-IN socket, a suitable cable is required with a 3.5 mm jack that is inserted into the AUX-IN socket of the vehicle.

The connected external audio source is played over the vehicle speakers and cannot be controlled via the Infotainment system controls.

The connection of an external audio source is indicated by [AUX] on the screen.

Connecting an external audio source to the AUX-IN multimedia socket

- Lower the base volume on the Infotainment system.
- Connect the external audio source to the AUX-IN multimedia socket.
- Start playback on the external audio source.
- In the MEDIA main screen, press the [SOURCE] function button and select [AUX].

The output volume of the connected external audio source should be adjusted to the volume of the other audio sources » page 84.

Information on operating an external audio source connected to the AUX-IN multimedia socket

<table>
<thead>
<tr>
<th>Operation</th>
<th>Effect</th>
</tr>
</thead>
<tbody>
<tr>
<td>Selection of another audio source from the Infotainment system.</td>
<td>The external audio source continues to run in the background.</td>
</tr>
</tbody>
</table>

Note
- Please read and observe the manufacturer’s instruction manual for the external audio source.
- Interference noise may be heard if the external audio source is powered from the 12-volt power socket of the vehicle.

Connecting an external audio source via Bluetooth®

Bluetooth® Audio mode allows you to listen to audio files being played on a Bluetooth® audio source (e.g., a mobile telephone) connected via Bluetooth® (audio playback by Bluetooth®) over the vehicle speakers.

Conditions
- The Bluetooth® audio source must support the A2DP Bluetooth® profile.
- In the Bluetooth settings menu, the [Bluetooth Audio (A2DP/AVRCP)] function must be activated » page 72.
Audio and Media Mode

Starting Bluetooth® audio transfer

- Activate Bluetooth® visibility on the external Bluetooth® audio source (e.g., mobile telephone).
- Lower the base volume on the Infotainment system.
- In the MEDIA main screen, press the [SOURCE] function button and select [BT audio].
- Press [Find new device] in order to connect an external Bluetooth® audio source for the first time [››› page 63].
- **OR:** Select a Bluetooth® external audio source from the list.
- Please refer to the instructions on the screen of the Infotainment system and on the Bluetooth® audio source regarding the rest of the procedure.

You may still need to manually start playback on the Bluetooth® source.

When playback on the Bluetooth® audio source is stopped, the Infotainment system remains in Bluetooth® Audio mode.

Controlling playback

The extent to which the Bluetooth® audio source can be controlled via the Infotainment system depends on the connected Bluetooth® audio source.

The available functions will depend on the Bluetooth® Audio profile that the connected external player supports.

With media players that support the AVRCP Bluetooth® profile, playback on the Bluetooth® audio source can be automatically started or stopped when the unit is switched to Bluetooth® Audio mode or to a different audio source. In addition, it is possible to view or change the track via the Infotainment system.

### Note

- **Due to the large number of possible Bluetooth® audio sources, it is not possible to guarantee fault-free operation of all described functions.**
- **Always switch off the warning and service tones on a connected Bluetooth® audio source, e.g. key tones on a mobile telephone, to prevent possible interference noise and malfunctions.**
- **To play music, do not link the external media player simultaneously to Bluetooth and the USB interface of the infotainment system, as this can cause limitations during playback.**
- **Depending on the external player connected, the response time of the system can vary.**

- **Do not connect an external media player to play music via Bluetooth® and via the USB port [››› page 33 at the same time with the Infotainment system, as this could cause playback limitations.**
- **If the external player is an Apple device™, it cannot be simultaneously connected by USB and by Bluetooth.**

### Jukebox (SSD)

**✓ Only available for the model: Navi System Plus**

The “jukebox” is located on the hard drive of the Infotainment system (SSD[1]).

Compressed audio files (MP3 and WMA) and some video files (Podcasts, AVIs, etc.) can be...
imported from different data storage devices to the **jukebox** and this used to play them.

The files will only be copied when the engine is running. Copying copy-protected CDs and DVDs is prohibited

**Importing files**

- In Media mode, press the **SETUP** function button and then select **Manage jukebox**.
- Press the **IMPORT** function button.
- Select the desired source from the **Select source** menu.

The data storage device is prepared. This operation may take a few seconds.

- Activate the checkboxes to the right of the files or folders to be imported.
- If **Select all** is activated, all files and folders on the data storage device will be imported.
- Press the **IMPORT** function button.

Depending on the selection, all files and folders will be imported with the indicated name to the **Jukebox**.

If no track information is available, the audio files will be placed in the following folders:

**Audio data CD**

- **Album**
- **Unknown albums**
- **Track. mp3**
- **Artists**
- **Unknown artists**
- **Unknown albums**
- **Track. mp3**

**Functions and progress display during the copying operation**

While copying, an animation is displayed along with the progress percentage on the import screen.

**Audio data CD:** It is not possible to copy and play files at the same time.

- Press the **Cancel** function button to end the import of the whole track that is currently being imported.
- To obtain information on the status of the import, press the **Information** function button.
- Press the **BACK** function button to close the import screen with the progress information.
- When the file import ends, a notification will appear.

**Deleting files**

- In Media mode, press the **SETUP** function button and then select **Manage jukebox**.
- Press the **DELETE** function button.
- Activate the checkboxes to the right of the files or folders to be deleted.
- If **Select all** is activated, all the files and folders on the data storage device will be deleted.
- Press the **DELETE** function button. The files and folders will be deleted according to the selection made.
- When the files have been deleted, a notification will appear.
- Press the **BACK** function button to close the menu.

**Opening stored audio and video files**

- Change to **Jukebox (SSD)** content » page 30.

When storing the tracks, they are stored under different categories and lists according to the information available.

The tracks saved can be checked and opened from these lists according to different categories.

**Jukebox**

- **Playlist**
- **Artist**
- **Album**

---

1) The name and extension of the file are examples.
Audio and Media Mode

- Music genre
- Title
- Video
- Non-playable files (an unsupported file has been imported).

Note

- If the Infotainment system cancels a copying operation, check the storage space on the internal hard drive and check the data storage device.
- Due to copyright laws, before any change in ownership of the Infotainment system, all files stored on the jukebox must be deleted.
- There are various possible reasons why files may be shown with inactive status (grey colour): files that cannot be imported (e.g. images), files that are already present in Jukebox or files that occupy more space than is available in the internal memory.

Connecting an external audio source via WLAN

✓ Only available for the model: Navi System Plus

WLAN allows wireless connection between an external audio source (for example a smartphone) and the Infotainment system.

To use this connection, the device being connected must have an app compatible with the UPnP (Universal Plug and Play) communication protocol, allowing the app to provide the system with the available media content.

Conditions

- Having a compatible (UPnP) app installed on the mobile device.
- Having the mobile hotspot found in the wireless connection configuration active.
- Pairing the mobile device to the Infotainment system using a password generated by the system. The pairing must be done from the mobile device that you wish to connect to the Infotainment system.

Starting the WLAN audio transfer

- Lower the base volume on the Infotainment system.
- Start the UPnP app or the app for the playback of the WLAN audio source.
- In the MEDIA main screen, press the SOURCE function button and select WLAN.
- Please refer to the instructions on the screen of the Infotainment system and on the WLAN audio source regarding the rest of the procedure.

Controlling playback

The extent to which the WLAN audio source can be controlled via the Infotainment system depends on the connected WLAN audio source and the application used.

Note

- The Infotainment system does not provide an internet connection, it only establishes a wireless connection between the mobile device and said system.
- Via the WLAN, only the connection between the device and the Infotainment system can be guaranteed, its operation depends on the application itself.

WLAN setup

✓ Only available for the model: Navi System Plus

To access the WLAN settings, the ignition must be on.

- Select the Media main menu by pressing the MENU infotainment button Fig. 1 and then select the Media context.
- Press the SETUP function button to open the Media Settings menu.
- Press the WLAN function button, then the Ntwrk settings (WLAN) button will appear, together with a text with information about using the WLAN.
- Press the Ntwrk settings (WLAN) function button, and then you will be able to
Audio and Media Mode

switch on/off the mobile hotspot and access the Configuration of the WLAN network.

- Press the Configuration function button to configure the WLAN network.

**Function button: function**

- **Mobile hotspot**: To switch the WLAN network on/off.
- **Security level**: To select the code type (encryption), choose WAP2 or No security level. An 8-character network key is automatically generated.
- **Network key**: Network key automatically generated. Press the function button to manually change the network key. The network key must have a minimum of 8 characters and a maximum of 63.
- **SSID**: Name of the Infotainment system WLAN network.
- **Do not send network name (SSID)**: Activate the checkbox to deactivate the visibility of the WLAN network.

To save the changes made to the mobile hotspot configuration, press the **STORE** button.

**DVD video mode**

✓ Only available for the model: Navi System Plus

The unit’s DVD drive is configured to read the regional code for the region in which the vehicle was originally sold.

**Start DVD mode**

- Insert a compatible DVD in the DVD drive.

The reading of DVD data may take a few seconds.

The DVD’s “intro” (short initial sequence) is played. Next, the different DVD menus are displayed.

**Controlling the DVD menu**

- Briefly touch the screen to activate the function buttons in the **DVD mode main menu** » Fig. 26.

**DVD video regional code**

Quite often, the playback of DVD video is limited to certain regions (for example, to the US and Canada) by so-called “region codes”. These DVDs can only be played on units that are coded for the same region.
### Audio and Media Mode

#### Function button: function

- Use the arrow buttons to browse the DVD menu. Confirm the selection by pressing the **OK** button.
- Press to open the DVD main menu.
- To move to the next or previous chapter.

<table>
<thead>
<tr>
<th>Function button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Play" /></td>
<td>Playback stops. The <strong>(C)</strong> function button changes to <strong>(H)</strong>.</td>
</tr>
<tr>
<td><img src="image" alt="Resume" /></td>
<td>Playback is resumed. The <strong>(H)</strong> function button changes to <strong>(C)</strong>.</td>
</tr>
</tbody>
</table>

**SETUP**

This menu contains the Video (DVD) settings. 

---

#### Video settings (DVD)

> Only available for the model: Navi System Plus

In the **DVD mode** main menu, press the **SETTINGS** function button and then select the option Video settings (DVD).

**Function button: function**

- **Format**: To select the screen format. If **Automatic** is selected, it adjusts automatically to the optimal format for the screen.
- **Audio channel**: select language for acoustic voice output.
- **Subtitles**: To select the subtitle language.
- **Enter/change PIN for parental settings**: Parental settings password.
- **Parental settings**: To select the level of protection for DVD playback.

The options in the Video setup (DVD) menu may vary depending on the DVD or the chapter currently being played.

The available audio language channels and subtitle files depend on the inserted DVD.

All or a part of the DVD video content may be protected by means of a password (PIN) if the DVD is compatible with parental settings. Furthermore, the level of protection can be set according to age with 1 being the least restrictive (appropriate for all audiences) and 8, the most restrictive (adults).

---

#### Media settings

- Select the **MEDIA** main menu by pressing the **MENU** infotainment button and then select the **Media** context.
- Press the **SETUP** function button to open the **Media Settings** menu.

**Function button: function**

- **Sound**: Sound settings. 
- **Manage jukebox**: To import files to the jukebox or delete stored files.
- **Mix/Repeat including subfolders**: Subfolders will be included in the selected playback mode.
- **Bluetooth**: Bluetooth® settings.
- **WLAN**: WLAN settings.
- **Video settings**: Settings for playback of DVD videos or files.
- **Remove safely**: In order to prepare the external data storage devices for their removal or disconnection. See also page 32, Insert or eject a memory card and page 33, External data storage device connected to USB port.
- **Traffic Program (TP)**: The TP function (traffic news station tracking) is active.

---

**Note**

- The visual appearance of the DVD film menus and the menu options which it offers are the responsibility of the DVD manufacturer.
- The difference in behaviour of some films when using the same mode is the responsibility of the DVD manufacturer.
- You may not be able to play video DVDs which you have burned yourself.
- The Infotainment system screen only displays the image when the vehicle is stopped. Whilst in motion, the screen disconnects (the image), but the audio remains active.

---

*a) Only available for the model: “Navi System Plus”.*
Using the *Images* menu, image files can be viewed (e.g. photos) individually or as a slideshow.

The image files must be stored on a compatible data storage device (e.g., a CD or an SD card).

- Press the [MENU] infotainment button and then select **Images**.
- Press the [SOURCE] function button to select the source where the pictures in question are located.

### Function button: function

<table>

<td>4MP</td>
</tr>
</tbody>
</table>

#### Image settings

Open the **Image settings** menu

- In the *Images* main menu, press the [SETUP] function button.

### Enlarging or reducing the view

To enlarge or reduce the view of the image displayed:

- Stretch or reduce the image on the screen using 2 fingers.

### Rotating the view/image

To rotate an image, in addition to the buttons provided for this (凰 / 凰), you can also press on the screen (e.g. with your thumb) and, while continuing to press with your thumb, slide another finger (e.g. your index finger) around it like a compass either clockwise (to rotate the image to the right) or anti-clockwise (to turn the image to the left). This will rotate the image 90° with respect to its current position.
Audio and Media Mode

**Function button: function**

- **Display time**: To adjust the display time of the images during a slideshow.

- **Repeat slideshow**: The active slideshow will be repeated indefinitely.
Navigation

Navigation, entry and control

Introduction

General information

The current vehicle position is determined by means of the GPS satellite system (Global Positioning System). Sensors in the vehicle measure distances that have been driven. The measurement values are compared with the detailed map data and the road information stored therein. Traffic reports, if any, will also be taken into account in the route calculation (dynamic route guidance page 50). Using all the data available, the Infotainment system calculates the optimum route to the destination.

The destination is defined by entering an address or a point of interest, e.g. a petrol station or hotel.

Spoken instructions and visual guidance on the navigation unit and on the instrument panel will direct you to your destination.

Depending on the country, some infotainment system functions can no longer be selected when the vehicle is travelling above a certain speed. This is not a malfunction, but simply a legal requirement.

Navigation messages

When the Infotainment system is unable to receive any data from GPS satellites (due to a dense tree canopy, underground car park), navigation can still continue using the vehicle sensors.

Possible navigation limitations

In areas that are not or are only partially digitised on the data storage device (e.g. insufficient definition of one-way streets and road categories), the Infotainment system will still attempt to provide route guidance.

If navigation data are unavailable or incomplete, the navigation system may be unable to determine the exact vehicle position. As a result, the navigation may not be as exact as usual.

Navigation area and updating of navigation data

Roads and streets are subject to constant change (e.g. new roads, changes to street names and building numbers). Therefore, if the navigation data is not updated, then errors or inaccuracies may occur during guidance.

SEAT recommends updating navigation data on a regular basis. Up to date navigation data can be acquired at a SEAT dealer.

Use navigation data from a memory card.

✔ Only available for the model: Navi System

The SD card is initially to be found inserted in SD card slot 2.

To update navigation data visit our website: www.seat.com.

● Insert the memory card page 32.
● Do not remove the memory card while testing. Wait for the testing icon to disappear.

If the inserted memory card contains valid navigation data, the following message appears: “The source contains a valid navigation database”. It is now possible to navigate with the memory card data. When the memory card is no longer needed by the hardware, it will be prepared for removal page 32.

1) Valid for: Navi System and Navi System Plus.
Navigation

The Infotainment system always requires the navigation data that is currently valid for this unit in order to allow all functions to be used in full. Using an old version may lead to errors during navigation.

Updating navigation data
To update navigation data visit our website: www.seat.com.

The navigation data must be installed after downloading. Navigation is not possible from the memory card.

Installing navigation data
The installation process takes about 2 hours.

If the Infotainment system is switched off, the installation process is paused and will automatically resume when switched back on.

- Switch the ignition on.
- Insert the memory card containing the navigation data » page 32.
- Press the [MENU] infotainment button » Fig. 1 and then select Settings.
- In the System settings menu, press the System information function button.
- Press Update software to import the stored navigation data.
- Follow the instructions displayed on the screen.

Once installed, the memory card can be removed. The memory card must be prepared for removal » page 32.

**CAUTION**

Do not remove the memory card while the navigation data is being installed. The memory card may be irreparably damaged!

**Note**

- The navigation memory card may not be used as memory storage for other files. The Infotainment system will not recognise the files saved.
- SEAT recommends only using original SEAT memory cards to use navigation data. The use of other memory cards could limit its operation.

### Updating and installing navigation data

**✓ Only available for the model: Navi System Plus**

The Infotainment system is equipped with an internal navigation data memory. The required navigation data are already installed on the system.

1) The speed class of an SD card.
The navigation functions are only enabled when navigation data for the current area are available on the Infotainment system.

The Navigation main menu allows you to select a new destination, call up a previously used or stored destination and search for points of interest.

Opening the main Navigation menu

- Press the (MENU) infotainment button ➔ Fig. 1 1 and then select Navigation to open the last menu that was open in navigation.
- If the main Navigation menu is not displayed, press the (MENU) infotainment button ➔ Fig. 1 1 again and then select Navigation until the main Navigation menu appears.

- OR: Press the 🔄 function button to return, menu by menu, to the main Navigation menu.

Function buttons and messages on the main Navigation menu

Function button: function

A  The split screen is displayed ➔ page 49.
B  Messages and function buttons on the map display ➔ page 50.
C  To enter a new destination ➔ page 44.
D  During route guidance ➔ page 46.
E  To activate or manage stored destinations ➔ page 46.
F  Search for points of interest (car parks, fuel stations and restaurants) within a particular search area ➔ page 48.
G  To modify or activate or deactivate the split screen and show POI ➔ Fig. 28 A ➔ page 48.
H  Open the Navigation Settings menu ➔ page 53.

New destination (enter destination)

- In the Navigation main menu, press the New destination function button.
- Press the Options function button and select the required type of destination entry (Search, Address or On map).
- Using voice control*, if you say Town, street and number, without pauses, and then the instruction “Start Route Guidance” a route to the given destination will start.

Search

Search for addresses and Points of Interest using the keypad to enter them ➔ Fig. 29.

For cities, post codes and points of interest, the full details must be entered. You can also search for points of interest by names or categories. When necessary, enter the name of the city to refine the search.
Navigation

**Using the**
- Select the destination on the map or enter it using GPS coordinates and confirm with OK.

**Function button: function**
- Save: To save the selected point of interest in the destination memory ➔ page 46.
- Edit: To edit a destination or to enter another destination.
- Route options: To adjust route options, see Navigation Setup ➔ page 53.
- Start: Starts guided navigation to the selected point of interest.

**Address**
After entering a country and a town, you can start navigating towards the centre of the selected town.

When narrowing down the destination address, **please note** that every entry restricts the available range of subsequent selections. For instance, if the street you are looking for is not in the postcode area you have selected in a previous window, you will not be able to find the street at the street selection stage.

**Function button: function**
- **Country**: To select the desired country.
- **City**: To enter the desired city or postcode.
- **Street**: To enter the desired street name.
- **House number**: To enter the desired house number.
- **Junction**: To select the desired intersection.
- **Last destinations**: Open My destinations menu ➔ page 46.
- **Start**: Start route guidance to the selected address.

**After starting route guidance**
- Select the desired route by pressing it.

The calculation will be performed in accordance with the data selected in the **Route options** menu ➔ page 53.

After starting route guidance, three alternative routes will be suggested depending on the selected setup ➔ Fig. 30. These routes correspond to the 3 route options that can be selected: Economical, Fast and Short.

**Route criteria: Meaning**
- **Blue route**: Economical route, the route is calculated by taking into consideration economic factors.
- **Red route**: Fastest route to the destination, even if it is necessary to make a deviation.
- **Orange route**: Shortest route to the destination, even if it results in longer travelling time. The route may have unconventional sections such as secondary roads.

- Select the desired route by pressing it.

The setting for the route criteria in the **Route options** menu is changed accordingly.

If no route is selected, then route guidance starts automatically after about one minute using the setting selected in the **Route options**.

**Navigation announcements (audible recommendations for the driver)**

Once the route has been calculated, the system gives the first navigation announcement. Up to 3 navigation announcements are given ➔
before a turn, e.g. “Prepare to turn left”, “Turn left in 300 metres” and “Now turn left”.

- Press the right-hand thumbwheel on the multi-function steering wheel to listen to the last navigation instruction.

The distances indicated largely depend on the type of road and the speed at which you are driving. For instance, navigation announcements are given much earlier on motorways than on urban roads.

Appropriate navigation announcements are also given on multi-lane roads, branching roads and at roundabouts, for example: “At the roundabout, take the second exit.”

A navigation announcement informs you when you have reached your “destination”.

A navigation announcement informing you that you have reached the “destination area” is given if the exact destination cannot be reached because it is located in a non-digitised area. It also indicates the cardinal point and the distance to the previously defined destination. Navigation resumes “offroad”.

During dynamic route guidance, you receive information about reported traffic congestion on the route. An additional navigation announcement is given if the route is recalculated due to traffic congestion.

During a navigation announcement, you can change its volume using the volume control up to a defined minimum or maximum volume. The following navigation recommendations will then be made at the adjusted volume.

For other adjustments to the navigation recommendations, see Navigation announcements settings. >> page 53.

### Note

If you miss a turning during route guidance and are currently unable to turn back, keep on driving until the navigation system offers a new route.

### Note

The quality of the navigation recommendations given by the Infotainment system depends on the navigation data available and any reported traffic problems.

### Route

In the Navigation main menu, press the **Route** function button.

The **Route** function button is only displayed with route guidance activated.

### Function button: function

**Stop route guidance**: Aborts current route guidance.

### Function button: function

- **Enter destination**: To enter a new destination or a new stopover >> page 44.
- **Congestion ahead**: To exclude a section (of 0.2 to 10 km in length) from the current route, e.g. to avoid congestion. To cancel the exclusion, press the **Route** function button and then **Cancel congestion**.
- **Change route**: The map of the calculated route appears and by holding a finger on the route and dragging the finger across said map, the route is changed to the road(s) that you want and the new route is then recalculated.
- **Route details**: View route information for current route.

*Only available for the model: Navi System Plus*

### My destinations (destination memory)

**NEW ROUTE**

<table>
<thead>
<tr>
<th>Routes</th>
<th>BACK ↞</th>

<tbody>
<tr>
<td>Route: 1</td>
<td>Delete</td>
</tr>
<tr>
<td>Route: 2</td>
<td></td>
</tr>
</tbody>
</table>

**Fig. 31** List of stored routes.

The stored destinations can be selected from the **My destinations** menu.
Press the [My destinations] function button in the main Navigation menu.

Select the desired function button. 
[Store position], [Routes], [Destinations], [Last destinations] or [Home address].

Store position

By pressing the [Store position] function button, the indicated position is stored as a Flagged destination in the destination memory.

To permanently store the saved position as a Flagged destination, it must be renamed in the destination memory. Otherwise the stored position will be overwritten the next time a flagged destination is stored.

Mark the Flagged destination in the destination memory.

Press the [Store] function button.

The name can be changed in the following input window. Press the [ ] function button to store the destination.

Routes

In the Route mode, you can define various destinations (final destination and stopovers).

The starting point of a route is always the current vehicle position determined by the Infotainment system. The destination is the end point of a route. Stopover destinations are driven to before the destination.

In the Navigation main menu, press the [My Dests] function button.

Press the [Routes] function button. The routes stored previously will appear Fig. 31.

If you have not stored any routes or want to create a new route, press the [New route] function button and then follow the instructions as for a new destination, before pressing [Store].

Pressing on a stored route brings up the following function buttons:

Function button: function

- [Delete]: To delete a stored route.
- [Edit]: To edit and store a route.
- [Start]: To start route guidance.

Function buttons and indications in the New route or Edit route menu

Function button or message: function or meaning

- [Stopover]:
- [Destination]:
- [Estimated time of arrival at destination]:
- [Calculated distance to destination]:

Press on the destination to display the function buttons.

<table>
<thead>
<tr>
<th></th>
<th>Delete destination.</th>

|   | To store the created tour in the destination memory. |
|   | To start route guidance. |
|   | To update calculated distance and estimated arrival time. |
|   | To stop route guidance to the active destination. |
|   | To move a stopover or a destination to another position on the list. Press and drag to move the destination. |

a) This function button is only displayed with route guidance activated and when a destination has been added to the tour.

b) This function button is only displayed with route guidance activated.
Last destinations
View of destinations for which a route has already been started.

Destinations
- Select the desired function button.

Function button: function

<table>
<thead>
<tr>
<th>Function button: function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Destination memory: View of destinations stored manually and from imported vCards.</td>
</tr>
<tr>
<td>Favourites: View of destinations stored as favourites.</td>
</tr>
<tr>
<td>Contacts: View of entries in the phonebook that have a stored address (postal address).</td>
</tr>
</tbody>
</table>

Home address
Only one address or position can be stored as the home address at any one time. The stored home address can be edited or overwritten.

If a home address has already been stored, route guidance will be started to the stored home address.

If a home address has not yet been stored, an address can be assigned as the home address.

Assigning the home address for the first time:
- Position: Press to store the vehicle’s current position as the home address.
- Address: Press to enter the home address manually.

Editing the home address:
The home address can be edited in the Navigation settings menu.

Points of interest (POI)

The points of interest saved in the navigation data memory are divided into different point of interest categories. Each point of interest category is assigned a symbol for display on the map.

If a database of points of interest has been imported into the Infotainment system, the category Personal POI is also shown.

In the Map settings menu, the categories of points of interest to display on the map can be configured. Up to 10 categories of points of interest can be selected.

Selecting a point of interest on the map

Function button: function

There are several points of interest in the area. Press this symbol to open a list of points of interest.

The only point of interest in this zone. Press the symbol to open the detailed view of the point of interest.

Fast search for a POI

In the Navigation main menu, press the POI function button and the three main categories will appear. Alternatively, enter the name of the point of interest to be searched using the new destination keypad, or press Search nearby on the map.

View

In the Navigation main menu, press the View function button.

Function button: function

Map display in two dimensions (conventional).
Function button: function

3D
Map display in three dimensions (bird’s eye view).
Buildings are also displayed in three dimensions. The places of interest and well-known buildings are shown in detail and in colour.

Pesa
To display the destination on the map.

PbA
To display the route on the map.

Auto / Day / Night
To change between day and night format.

Split screen
Press to display the split screen > page 49.

POI
Display points of interest on the map.

a) This function button is only displayed with route guidance activated.

Function button: function

POI
Position: current vehicle position in coordinates and GPS status (satellite reception).

Fig. 33 Split screen displayed.

The split screen > Fig. 33 A may display any of the information described below:

• Press on the name of the split screen to select a display option.

Function button: function

Audio: Indicates the selected audio source.

Compass: Displays a compass with the current travelling direction and indicates the current position of the vehicle (street name).

Manoeuvres: Displays a list of the next manoeuvres, POIs or TMCs on the route and pressing them brings up additional information.

Most frequent routes: Information on the user’s most frequent routes.

Fig. 33 Split screen displayed.

a) This function button is only shown when route guidance is not active or when predictive route guidance is active.

Press the function button to close the split screen.

At any moment during navigation, pressing inside the map will make a pop-up menu appear with the following functions:

Function button: function

Street name or coordinates: shows the details of the point selected on the map.

Only when you press on an icon on the map:

POI: name of the point of interest (when only one appears on the map).

Group of POIs: more points of interest (when you press on the map on various POIs grouped together).

Favourite: name of the favourite.

Home: Home address.

Start route guidance: starts guidance directly.

Add stopover destination: only when you have an active route.

Search nearby: enters in the search menu, but only for the area around the point selected on the map.
Function buttons and messages on the map display.

To activate function buttons \(\text{function} \) and \(\text{function} \), press function button \(\text{function} \).
Navigation

Traffic reports on map (selection)

<table>
<thead>
<tr>

</tr>
<tr>
<td>◆</td>
<td>Road closed to traffic</td>
</tr>
</tbody>
</table>

During route guidance, traffic congestion that does not affect the route calculated is displayed in grey.

The extent of the traffic congestion along the route calculated is shown by a red line.

Any incidents that affect the route calculated and have caused the route to be recalculated are displayed in orange.

The position of a symbol indicates the start of the traffic congestion if it is clearly defined in the traffic report.

Predictive navigation

When you activate Predictive navigation, the system detects and stores in the background routes that are frequently followed, without them being active destination routes. This function has no navigation announcements unless the user needs to listen to them and presses the right-hand thumbwheel on the multi-function steering wheel.

- On the main screen of the Navigation menu, in the pop-up window, press the [Frequent routes] button. To display frequently followed routes press the [Show on map] button. Fig. 35

Importing vCards (electronic business cards)

Importing vCards to the destination memory

- Insert the data storage device with the stored vCards or connect it to the Infotainment system page 23.
- Press the [SETUP] function button in the main Navigation menu.
- In the Navigation settings menu, press the [Import destinations] function button.
- Select the data carrier with the vCards saved in the list.
- Press [Import all vCards in the folder].
- Confirm the import notice with the [OK] function button.

The saved vCards will now be in the destination memory page 46 and may be used for navigation.

Note

Only one address per vCard can be imported. In the event any vCards have multiple addresses, only the main address will be imported.
### Importing Personal POI

**Importing the Personal POI to a points of interest destination memory**

- Insert the data storage device with the stored Personal POI or connect it to the Infotainment system » page 23.
- Press the [MENU] infotainment button **Fig. 1** and then select **Settings**.
- In the **Settings** menu, press the [Manage memory] function button.
- Press [Update my POIs] and then press [Update] and [Next] to import the Personal POIs.
- Confirm the import notification with the [OK] function button.

The stored Personal POI are now in the points of interest destination memory » page 48 and can be used for navigation purposes.

The stored Personal POI can be deleted in the **Navigation Settings** menu » page 53.

### Navigation with images

**Selecting an image and starting route guidance**

Bear in mind the requirements and formats of the compatible images » page 23.

- Insert the data storage device with the stored images or connect it to the Infotainment system.
- Press the [MENU] infotainment button **Fig. 1** and then select **Images**.
- Press the [SOURCE] » Fig. 36 function button and select the data storage device where the images are stored.
- Select the desired image.
- If the image displayed was taken using GPS localisation, the [ ] function button will appear. Press to start route guidance.

### Road sign indicators

The road sign indicators must be active in the **Navigation Setup** menu » page 53.

If road signs for the road being travelled are stored in the navigation data, the system can show them on the map display (e.g. a speed restriction).

Please bear in mind how recent the navigation data is and the limitations of the system » page 42!

### Traffic sign recognition

Some vehicles are also equipped with a camera for traffic sign recognition. If traffic sign recognition is installed in the vehicle and activated, the recognised traffic signs and additional information are displayed in the map view.

Read and take note of the information and indications provided by the traffic sign recognition system in the vehicle » Booklet Instruction Manual.

### Route guidance in demo mode

If demo mode is activated in the **Navigation Settings** menu » page 53, an additional pop-up window opens when you start route guidance.
Pressing the **Demo mode** function button starts a “virtual route guidance” to the destination you have entered.

If you press the **Normal** function button, a “real route guidance” starts.

The sequence of events and the operations in virtual route guidance are similar to those in real route guidance.

Virtual route guidance is repeated when you reach the fictitious destination and always starts again from the starting point if not aborted beforehand.

If the starting point for demo mode has been defined manually in the **Navigation Settings** menu, virtual route guidance will start from the position set.

A manually entered starting point is overwritten with the current vehicle location if the vehicle moves off.

---

**Note**

Disable demo mode after use, otherwise you will be prompted to choose between virtual and normal route guidance each time you start route guidance.

---

### Navigation settings

#### Settings

Press the **SETUP** function button in the main **Navigation** menu.

### Function button: function

**Route options**: To make adjustments to route calculation.

- **Suggest 3 alternative routes**: After starting route guidance, 3 alternative routes are suggested ➔ page 45.
- **Route**: Select the route type.
  - **Economical**: The route is calculated by taking into consideration economic factors.
  - **Fast**: The fastest route to the destination.
  - **Short**: Shortest route to the destination, even if it results in a longer travelling time.
- **Most frequent routes**: Information on the user’s most frequent routes.
- **Dynamic route**: Dynamic route guidance is activated when a TMC is received ➔ page 50.
- **Avoid motorways and highways**: Motorways will be excluded from the calculation whenever possible.
- **Avoid ferries and motorail trains**: Ferries and motorail trains will not be considered in the calculation of the route whenever possible.
- **Avoid toll roads**: Toll roads will be excluded from the calculation whenever possible.
- **Avoid tunnels**: Tunnels will be excluded from the calculation whenever possible.

**Show available toll stickers**: To mark the available toll stickers on the list (if Avoid routes requiring toll stickers must be active).

Roads requiring toll stickers that have been marked as having said toll sticker will be taken into account in the calculation of the route.

**Include trailer**: Calculate the route and arrival time for the vehicle with a trailer.

**Map**: To make adjustments to the visual display of the map.

- **Show road signs**: The road signs stored in the navigation data for the road being travelled will be displayed during route guidance ➔ page 52.
- **Lane guidance**: During route guidance, when driving and turning on multi-lane roads, an additional display is shown with lane guidance. This will only appear if there is information in the database for the area being driven in.
- **Show favourites**: The stored destinations are shown on the map as favourites (★).
- **Show POI**: To select which point of interest categories are displayed on the map ➔ page 48.
- **Show POI flags**: View of category logos of the selected points of interest (e.g. view of petrol station logos).
Navigation

**Function button: function**

**Manage memory**: To modify saved destinations.

**Sort contacts**: To select the sequential order of the entries in the phonebook that have (postal) addresses, see also page 46.

**Define home address**: To assign or edit a home address, see also page 48.

**Delete my points of interest (POI)**: To delete the points of interest stored in the destination memory page 52.

**Update my POIs**: To update the stored points of interest page 52.

**Import destinations (SD/USB)**: To import electronic business cards (vCards) into the destination memory page 51.

**Delete user data**: To delete the stored destinations (e.g., the Last destinations or the Destination memory).

**Navigation announcements**: To make adjustments to navigation announcements.

**Volume**: To adjust the volume for driving recommendations.

**Entertainment fading (nav. announcements)**: Adjusting the volume of the active audio source during navigation instructions.

**Navigation announcements**b): To adjust driving recommendations during route guidance.

**Comprehensive**: Detailed driving recommendations and other directions.

**Brief**: Some recommendations and directions are muted.

**Function button: function**

**Congestion only**: Recommendations are only given in the event of congestion along the route (e.g., traffic jam).

**No voice guidance during call**: No audible driving instructions will be given during a telephone conversation.

**Warning: My points of interest**: Audible announcement when nearing a point of interest.

**Fuel options**: To make adjustments relating to fuel.

**Select preferred fuel station**: The selected petrol station mark will be shown before other points of interest in the search.

**Fuel warning**: The warning to refuel is active.

If the fuel level reaches the reserve level, the corresponding warning is generated which permits the search for petrol stations.

**Version information**: Information on the stored navigation data.

**Speed limits**: Shows the speed limits, depending on the road, for the current country.

**Advanced setup**: To make advanced adjustments to the navigation.

**Time display**: Displayed during route guidance.

**Estimated time of arrival**: The estimated time of arrival at the final destination is displayed.

**Duration**: The estimated travelling time to the final destination is displayed.

**Status line**: Displayed during route guidance.

**Function button: function**

**Destination**: The distance calculated to final destination is displayed.

**Next stopover**: The calculated distance until next stopover is displayed.

**Note: National border crossed**: Displays the speed limits of the country in question when crossing the border.

**Demo mode**: When Demo mode is activated and route guidance is started, virtual guidance to the entered destination can be initiated page 52.

**Define demo mode starting point**: If demo mode is activated, a fictitious starting point for virtual route guidance can be defined when the vehicle is stationary.

**Waypoint mode**: To start Offroad navigation.

---

**Navigation in Offroad mode**

**Introduction**

✓ Only available for the model: Navi System Plus

Offroad* navigation is a function for offroad driving that provides directions in “non-digitised areas” at low speeds.

* Non-digitised areas are areas about which the system does not have information for the
Navigation

It does not detect streets, buildings or natural limits such as mountains or rivers, although they may be shown on the map.

Offroad** navigation is not suitable for driving on conventional roads as it does not detect one-way streets, motorway entries or similar.

**Offroad Navigation Menu

✓ Only available for the model: Navi System Plus

**Function buttons in the Offroad Navigation menu

**Function button: function

- RECORD: Initiates the plotting of an Offroad tour.
- MEMORY: Opens a list allowing the selection of a stored Offroad tour.
- EXIT: Ends Offroad navigation.

**Recording an Offroad tour

✓ Only available for the model: Navi System Plus

**Starting recording

- In the pop-up window, the user is able to plot the tour with a given destination or start plotting the route without giving a final destination.
- Starts plotting the route.

The *offroad* markers can be recorded by indicating a manual waypoint.

- In the Offroad Navigation menu, press the [ADD WAYPOINT] function button. The tour waypoints defined manually are shown on the map by a marker.

**Ending recording

- Press the [STOP RECORDING] function button in the main Offroad Navigation menu.

An Offroad tour is formed by a series of stored waypoints.

**Starting recording

- In the Offroad Navigation menu, in the pop-up window press the [RECORD] pop-up button.

Press the Setup function button in the main Navigation menu.

- Press the Waypoint mode function button in the menu.
- The Offroad Navigation menu opens

**Fig. 37** Offroad Navigation Menu start

**Fig. 38** Recording an Offroad tour

The offroad markers can be recorded by indicating a manual waypoint.

In the pop-up window, the user is able to plot the tour with a given destination or start plotting the route without giving a final destination.

- Starts plotting the route.

The *offroad* markers can be recorded by indicating a manual waypoint.

- In the Offroad Navigation menu, press the [ADD WAYPOINT] function button. The tour waypoints defined manually are shown on the map by a marker.

**Ending recording

- Press the [STOP RECORDING] function button in the main Offroad Navigation menu.

An Offroad tour is formed by a series of stored waypoints.

Starting recording

- In the Offroad Navigation menu, in the pop-up window press the [RECORD] pop-up button.
Managing stored Offroad tours

✓ Only available for the model: Navi System Plus

Only available for the model: Navi System Plus

Press the MEMORY function button in the Offroad Navigation menu.

A list of stored Offroad tours opens, if there are any.

When a tour is selected, the following icons will appear: Export the tour to an SD card.
Edit the name of the tour.
Delete the tour.
Load tour

Creating an Offroad tour

✓ Only available for the model: Navi System Plus

Loading an Offroad tour

When the Offroad tour is selected, press Play ▶ and the selected tour will be loaded onto the Navigation system.

Creating an Offroad tour

Start route guidance

• Loads the stored Offroad tour.
• Starting off in a stored route is not detected by the system automatically.

Setup

Function button: function

Start: Starts the complete Offroad tour.

When route guidance starts, the system switches to the map view.

Stopping route guidance

• Press the Options button on the screen and then press Stop.

End waypoint navigation

• Press the EXIT function button in the Offroad Navigation menu.

WARNING

Terrain features are disregarded during route guidance. Drive slowly and following the instructions in order to perform the manoeuvre as far as possible!

• The general direction of travel is indicated straight ahead by direction arrows in the Infotainment System pop-up window.

Note

If an Offroad tour is being recorded, this is automatically stored if Offroad navigation is discontinued.
CAR menu

Introduction to managing the CAR menu

Press the [MENU] infotainment button ➤ Fig. 1 and then select Vehicle to access the main menu with the following options:

- VIEW
- MINIPLAYER, in the top right corner (Radio or Media function if the HDC descent control* is not active).
- PREVIOUS-NEXT (to change screen)
- SETUP ➤ Booklet Instruction Manual, chapter System setup (CAR)

With the function button [VIEW] you can access the following information:

- SPORT*
- OFFROAD*
- CONSUMERS
- DRIVING DATA
- ECOTRAINER*

Press the [MENU] infotainment button ➤ Fig. 1 and then select Vehicle.

Press the [VIEW] function button and then select SPORT.

If the corresponding equipment is available, the information that appears in the Sport option is the following ➤ Fig. 41:

1. Instantaneous power expressed in kW
2. G forces
3. Turbo pressure, expressed in bar (“bar”), kilopascals (“kPa”) or in pounds per square inch (“psi”). Press the Setup button to change the units of pressure ➤ page 83
4. Coolant temperature
5. Oil temperature

Only three of these items of information can be displayed at the same time, but the user chooses which to display, and in what order, by moving the finger vertically over the dials.

If the Next button is pressed, the Lap timer menu is displayed; this is described below ➤ Fig. 42:

1. Analogue lap timer.

---

1) This lap timer is independent of the one that appears on the instrument panel ➤ Booklet Instruction Manual
A new lap timer recording is started by pressing on the surface of the digital lap timer +.

Stop lap timer/Partial time.
The analogue lap timer stops for 5 seconds. After 5 seconds, the analogue lap timer goes back to showing the real time.

Statistics/delete last lap timer recording.

If the corresponding equipment is available, the information that appears is the following:

1. Compass.
2. Altimeter: altitude above sea level.
3. Turning angle of steered wheels.
4. Coolant temperature.
5. Lubricating oil temperature

Only the altimeter and 2 more of these items of information can be displayed at the same time, but the user chooses which to display, and in what order, by moving their finger vertically over the dials.

By pressing the Consumers button, information on the status of the vehicle’s main consumption devices is obtained. It is shown via a consumption indicator bar in l/h (gal/h).1)

Driving data

The onboard computer is equipped with 3 memories that work automatically. In these memories you can see the distance travelled, average speed, time passed, average consumption and autonomy of the vehicle.

1. Since start
Indicates and stores the values of the journey completed and the consumption from when

1) In the case of Gas (CNG) vehicles, the units are in kg/h.
the ignition is switched on to when it is switched off.

2. Since refuelling
Display and storage of the values for the journey and the consumption. By refuelling, the memory will be erased automatically.

3. Long-term
The memory records the values for a specific number of partial trips, up to a total of 19 hours and 59 minutes or 9999 km (or miles), depending on the model of instrument panel.

When one of these values is reached (depending on the version of the instrument panel), the memory is automatically deleted and it starts counting from 0 again.

If the corresponding equipment is available, the ECOTRAINER will provide information on driving style. The information on driving style is only evaluated and displayed when moving forward.

Ø ECO points: Driving style display
This indicates the driving style since starting the vehicle on a scale of 0 to 100. The higher the score displayed, the more efficient the driving style. To see more information, press the display. It shows statistics for the last 30 minutes of driving since starting the vehicle. If the car has not yet been driven for 30 minutes, it shows values from the last trip in grey.

Ø l/100 km: Average fuel consumption
Shows the average fuel consumption. The value is calculated by using the kilometres covered since starting the vehicle. To see more information, press the display. It shows statistics for the last 30 minutes of driving since starting the vehicle. If the car has not yet been driven for 30 minutes, it shows values from the last trip in grey.

ECO tips: Tips on how to save fuel
By pressing the ECO tips function button, you can view tips on how to save fuel. These tips can only be viewed when the vehicle is stopped.
Evaluation of efficient driving style

The efficiency of the driving style is reflected by different elements on the display.

Display » Fig. 46: Meaning

1. Different symbols are shown on the left of the columns that report on the current driving style » Table on page 60.

2. The white column is an indication of where the efficiency graph begins (from left to right). It shows the position of the evaluation that is currently being performed.

3. Bars to represent acceleration. The position of the car represents the acceleration. If speed is constant, the car remains in the central area. When accelerating or braking, the car moves forward or backward respectively.

4. Columns to show driving style efficiency. On the horizon, the columns represent the efficiency of the driving style in a retrospective manner and move from left to right every five seconds or so. The higher the height of the columns, the more efficient the driving style. The colour of the sky represents the average of the last three minutes. The colour changes from grey (less efficient) to blue (more efficient).

Symbols » Fig. 47: Meaning

A. Foresight when driving. If sudden changes of acceleration occur, driving style efficiency is reduced.

B. Gear-change indicator.

Vehicle status

Fig. 48 Standard representation: vehicle status.

Press the Vehicle status button to access information on the Vehicle status messages and Start-Stop System. The Vehicle status messages are displayed » Fig. 48, in addition to being specified on the corresponding button.

Depending on the parts affected by these messages, they will be indicated in different colours (depending on their significance) in the vehicle display.

To access the Tyre Pressure Monitoring System you must press the Previous or Next buttons.

From this same menu, using the button SET, the tyre pressures are stored.

Note

The values that appear in the figures » Fig. 44, » Fig. 45, » Fig. 48 and » Fig. 49
are indicative and may vary depending on the features.
Telephone management system (PHONE)

Introduction to the telephone management system

**General information**

The Telephone functions described below can be used through the Infotainment system if there is a mobile telephone connected to it via Bluetooth®.

In order for the mobile telephone to be able to connect to the Infotainment system the telephone must be equipped with Bluetooth®.

If there is no mobile telephone connected to the Infotainment system, the telephone management system will not be available.

The instructions shown on the screen for the telephone menus will depend on the mobile telephone used. There may be variations.

Only use compatible Bluetooth® devices. For further information on compatible Bluetooth® products, ask your nearest SEAT dealer or check on the internet.

Use the instruction manual of the mobile telephone and of any accessories.

If you detect any operating issues between your mobile telephone and the Infotainment system, restart your mobile by switching it off and on again.

You may experience poor reception or may be cut off in areas where the signal is weak.

Most electronic devices are shielded against HF (high-frequency) signals. In any case, the electronic equipment may not be protected from the HF signals of the telephone management system. This may cause interference.

**WARNING**

Speaking by telephone and operating the mobile telephone whilst driving can distract you from the road and cause an accident.

- Always drive carefully and responsibly.
- Select volume settings that allow you to easily hear signals from outside the vehicle at all times (e.g. emergency services sirens and horns).
- In areas of little or no coverage or, in some cases, in a tunnel, garage or underpass, your call may be cut off and you may not be able to make even emergency calls.

**WARNING**

If a mobile telephone is not secured or is incorrectly secured in the vehicle, it could move around the passenger compartment in the event of a sudden driving manoeuvre or emergency stop, resulting in injury.

- While the vehicle is in motion, always secure the mobile telephone properly outside the airbag deployment zone.

**WARNING**

Mobile telephones may interfere with and alter the correct operation of pacemakers if they are carried directly over them.

- Maintain a minimum distance of at least 20 centimetres between the aerials of the mobile telephone and the pacemaker, as mobile phones may affect the functioning of pacemakers.
- Do not carry your switched-on mobile telephone in your breast pocket directly over the pacemaker.
- If you suspect interference, switch off the mobile telephone immediately.

**CAUTION**

High speeds, poor weather or road conditions and the quality of reception can all affect the quality of a telephone conversation in the vehicle.

**Note**

- Restrictions on the use of devices using Bluetooth® technology may apply in some countries. For further information, contact the local authorities.
If you wish to connect a device to the telephone management system via Bluetooth® technology, consult the safety warnings in its instruction manual. Only use compatible Bluetooth® devices.

### Areas where special regulations apply

Switch off the mobile telephone and the mobile Bluetooth function in places with a risk of explosion. In the majority of cases, these places are signposted, but not always clearly. See in General information on page 62. They include, for example:

- the vicinity of chemical pipelines and tanks
- The lower decks of boats and ferries.
- In the proximity of vehicles that run on liquid gas (such as propane or butane).
- places where the air is laden with chemicals or particles such as flour, dust or metal powder.
- all other places where the vehicle engine must be switched off.

#### CAUTION

In areas where special regulations apply or the use of mobile telephones is prohibited, both the telephone and the telephone management system must be switched off. The radiation produced by the mobile telephone when switched on may interfere with sensitive technical and medical equipment, possibly resulting in a malfunction or damage to the equipment.

### Bluetooth®

Bluetooth® technology allows a mobile telephone to be connected to your vehicle's telephone management system. In order to use the telephone management system with a mobile telephone with Bluetooth® technology, it is first necessary to pair them.

Some Bluetooth® mobile telephones detect and automatically connect when turning on the ignition if a connection has been previously established. For this to take place the telephone must be switched on and its Bluetooth® function activated, and there must be no active Bluetooth® connection with other devices.

Bluetooth® connections are free.

Bluetooth® is a registered trademark of Bluetooth® SIG, Inc.

#### Bluetooth profiles®

When a mobile phone is connected to the telephone management system, a data exchange takes place via one of the Bluetooth® profiles.

- **Hands-free Bluetooth profile (HFP):** If a mobile telephone is connected to the telephone manager through the HFP, calls can be made wirelessly through the hands-free device. This function also requires other Bluetooth profiles such as the phonebook download and instant messaging.

- **Audio profile (A2DP):** Bluetooth profile for transmitting audio signals with stereo quality. This function can also connect other additional Bluetooth profiles for viewing tracks and for controlling playback on the mobile device.

#### Note

To prevent them from being heard through the speakers, the button and mobile telephone alert tones must be disconnected. Where necessary, disconnect the headset from the mobile telephone you wish to connect to the system.
**Pair and connect a mobile telephone to the Infotainment system**

In order to manage a mobile telephone via the Infotainment system, it is necessary to pair both devices **once**.

For your safety, we recommend you make the link when the vehicle is stationary. In some countries it is not possible to perform the pairing with the vehicle running.

**Conditions**

You must guarantee the following setup in the mobile phone and the Infotainment system:

- The ignition must be switched on.
- The **Bluetooth® function** of the mobile telephone and the Infotainment system must be active as well as visibility.
- The **keypad lock** on the mobile telephone must be deactivated.

Follow instructions in the manual for the mobile telephone.

After turning on the ignition, the visibility of the **Bluetooth® function** activates.

During the pairing process it is necessary to enter data via the mobile telephone’s keypad. To do so, the mobile telephone must be ready.

**Starting mobile telephone pairing**

- Make sure the Bluetooth function of the mobile device is active and visible.
- Press the [MENU] infotainment button » Fig. 1 1 and then select Telephone.
- Press the [Find telephone] function button and then [Results].

**OR:**

- Press the [Setup] function button.
- Press the [Select telephone] function button and then [Results].

**OR:**

- Press the [Setup] function button.
- Press the [Bluetooth] function button.
- Press the [Find devices] function button and then [Results].

**OR:**

- Connect from the mobile device itself.

The name of the Bluetooth function of your Infotainment system will be displayed in the main PHONE screen and you can edit this via the [Bluetooth Setup] menu » page 72

The search process can take up to 1 minute. On the screen the system will dynamically update the names of the Bluetooth devices found.

As soon as the search is completed, the names of the Bluetooth® devices found are displayed on-screen.

- In the Infotainment system select the mobile telephone to which you want to connect from the list of Bluetooth devices found. In certain circumstances, it is possible that to finish the connection between the two devices, you must enter additional data in the mobile telephone and Infotainment system.
- If necessary, confirm the link to the mobile telephone.
- Use your mobile telephone to enter and confirm your PIN code, as indicated in the display of the infotainment system.

**OR:**

- Compare the PIN code shown on the display of the Infotainment system with that shown on the mobile telephone. If they match, confirm on both devices.

The infotainment system and the mobile telephone will now be connected to each other.

When the pairing has been finalized correctly, the PHONE main menu will appear. The phonebook and call lists stored in the mobile phone will be loaded once the requests have
been accepted in the mobile phone. The duration of the loading process depends on the amount of data stored on the mobile telephone. After loading, the data will be available on the Infotainment system.

**Pairing and connection of mobile telephones**

You can pair up to 20 mobile telephones to the Infotainment system, but there can only be two mobile phones simultaneously connected as hands-free, and a third device as BT audio at any time.

When the Infotainment system is switched on, it automatically connects to the last connected mobile telephone. If it is not possible to connect to this mobile telephone, the telephone management system will try to automatically connect to the next mobile telephone on the list of paired devices.

The **maximum** range of the Bluetooth® is approximate. 10 metres. The active Bluetooth® connection disconnects if this distance is exceeded. The connection is **automatically** re-established as soon as the device is once again within Bluetooth® range.

If the maximum number of paired devices is reached and you wish to pair another one to the system, it will automatically replace the one least used recently. If you wish to replace it with another one, the user must erase it beforehand. To do so:

- Press the Setup button on the device while in telephone mode.
- Press the function button [Bluetooth setup].
- Activate the [Paired devices] function button.
- In the list of paired devices, press the function button next to the mobile telephone to be deleted and then press **Delete** to confirm the process.

**Note**

- It may be necessary to confirm the phonebook data transfer request on the mobile telephone.
- Check that there are no requests pending acceptance in your mobile phone. If there are, this could block some of the functions in the PHONE menu.

**Description of the telephone management system**

**Introduction**

Some functions and setup can only be performed when the vehicle is stopped and are not available on all mobile telephones.

With the help of the telephone manager, up to 3 mobile telephones can be connected to the Infotainment system via the Bluetooth profiles (for example, one used as a Bluetooth-audio player and/or another two as hands-free telephones).

**PHONE main menu**

The data from the phonebook, the call lists and the stored speed dial buttons are assigned to a user profile and remain stored on the telephone management system. This information will be available every time the mobile telephone is connected to the telephone management system.
After the first connection, it will take a few minutes for the data from the phonebook of the linked mobile phone to be available in the Infotainment system. The next time that the mobile telephone is connected (e.g. on the next journey) the phonebook is updated automatically.

If any entries in the mobile phonebook have been modified while connected, a manual update of the phonebook data can be initiated from the User profile settings menu → page 72.

Telephone management can store a maximum of 4 user profiles for mobile telephones. If you wish to link/connect another mobile phone, the oldest user profile will automatically be replaced.

**Telephone management system function buttons**

- Press the **MENU** infotainment button → Fig. 1 and then select **Telephone** to access the PHONE main menu.

<table>
<thead>
<tr>
<th>Function button: function</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Name of connected mobile telephone. Press the icon to the left to connect or pair with another mobile telephone.</td>
</tr>
<tr>
<td>2</td>
<td>Speed dial buttons, to which telephone numbers from the phonebook may be assigned respectively → page 71.</td>
</tr>
<tr>
<td>3</td>
<td>Change to another connected telephone: Allows user to change between connected telephones as hands-free. This button will only be visible when there are two telephones connected as hands-free. The active user profile corresponds to the telephone appearing on the screen.</td>
</tr>
</tbody>
</table>

**Display and symbols of the telephone management system**

### Telephone management system (PHONE)

#### Display: Meaning

<table>
<thead>
<tr>
<th>Icon</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1.png" alt="Phone Icon" /></td>
<td>View of stored telephone number or name. If the name stored in the phonebook has an assigned photo, it can be displayed.</td>
</tr>
<tr>
<td><img src="image2.png" alt="Call Icon" /></td>
<td>Press to accept a call.</td>
</tr>
<tr>
<td><img src="image3.png" alt="Call Icon" /></td>
<td>Press to end a call.</td>
</tr>
<tr>
<td><img src="image4.png" alt="Call Icon" /></td>
<td>OR: Press to reject an incoming call.</td>
</tr>
<tr>
<td><img src="image5.png" alt="Microphone Icon" /></td>
<td>Press to mute or to reactivate the ring tone during an incoming call.</td>
</tr>
<tr>
<td><img src="image6.png" alt="Microphone Icon" /></td>
<td>Press to mute the microphone during an active call and to reactivate it.</td>
</tr>
<tr>
<td><img src="image7.png" alt="Call Icon" /></td>
<td>This button keeps the call active. While the call is on hold the listener will not hear the conversation. To reactivate it, press the call accept button. To reject it, press the reject button.</td>
</tr>
<tr>
<td><img src="image8.png" alt="Ringer Icon" /></td>
<td>Press to add a participant to the active call.</td>
</tr>
<tr>
<td><img src="image9.png" alt="Battery Icon" /></td>
<td>Charge status of a mobile telephone connected via “Hands-free profile” (HFP) Bluetooth®.</td>
</tr>
<tr>
<td><img src="image10.png" alt="Signal Icon" /></td>
<td>Strength of coverage signal received by the mobile telephone.</td>
</tr>
</tbody>
</table>

#### Private mode

Private mode can only be activated during an active call.

To activate private mode:

- ![Setup Icon](image11.png) menu.

- Uncheck the checkbox: ![Hands-free Icon](image12.png).

With the private mode activated the active audio and microphone become that of the mobile phone connected to the hands-free. When deactivated, the audio reverts to the vehicle's audio system. This configuration is only applicable to the active call, so for subsequent calls, the audio will revert by default to vehicle's audio system.

#### Multiple calls

The telephone management system allows the user to interact with a maximum of three calls on the screen.

Only one of the calls may be active.

#### Simultaneous calls

The user can merge various calls into a conference call by pressing the ![Conference Icon](image13.png) button. To do this there must be at least two calls. Once the conference call has begun, the user can add up to a maximum of 5 participants.

Once the conference call has been set up, the user can consult the list of participants by pressing the Simultaneous calls image.

Depending on the mobile device, you can hang up the call with one of the conference call participants or remove them from it while keeping them on a separate call.

#### Enter telephone number menu

Press the ![Dial NO. Icon](image14.png) function button from the PHONE main menu.

---

**WARNING**

Remember that the driver must not operate the mobile telephone while driving.

**Note**

Multiple call and simultaneous call functions are subject to the services associated with the user's SIM card.
Possible functions

Enter telephone number
- Entering a phone number with the keypad.
- Press the function button to make a call.

Select a contact from the list
- Enter the first letters of the contact to find using the keypad. The available entries appear in the phonebook.
- Select the desired contact from the phonebook to make the call.

Redial
- Press button Fig. 53 and the last number dialled will be shown on the display. To make a call, press the button again.

Enter the country code
- To enter a country code, instead of the first two digits (international access code e.g. “00”) you can enter the character “+”.
- Press the button for approx. 2 seconds to add the +.

Assistance call
- Press the function button to obtain help in the event of breakdown.

Possible functions

Information call
- Press the function button to obtain information on the SEAT brand and the additional services contracted related to traffic and travel.

Call mailbox
- Press the Voicemail function button to make the call.
- OR: Press the function button for approx. 2 seconds to make the call.
- If the number for the mailbox has not yet been stored, enter it and confirm with OK.

Note

Breakdown service and information calls can incur an additional cost on your telephone bill.

Phonebook Menu (contacts)

As soon as the first pairing is performed, it may take some time for the phonebook data from the paired mobile telephone to be loaded.

1 Depending on the device, only the contacts from the telephone memory are loaded.
Telephone management system (PHONE) available on the Infotainment system. Depending on the volume of data to be transferred, the process can take several minutes. It may be necessary to confirm the data transfer on the mobile telephone.

The phonebook can also be opened during a telephone call.

If the name stored in the phonebook has an assigned photo, it can be displayed in the list next to the name [page 71, Telephone settings]. For this purpose the option [Show pictures for contacts] must be activated in the Phone settings and your mobile phone must support this function (check the compatibility list).

In the PHONE main menu, press the Contacts function button to access the phonebook.

### Possible functions

<table>
<thead>
<tr>
<th>Search for a contact in the search window</th>
</tr>
</thead>
<tbody>
<tr>
<td>Press the [Search] button to open the search window. Enter the name of the contact to be searched for in the window. As the characters are entered, a contact is displayed in the input field. The number of matching results is displayed to the right of the input field. Press the function button to change to the list. Search the list and press the desired contact to make the call.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Opening the detailed view of a contact</th>
</tr>
</thead>
<tbody>
<tr>
<td>Press the [Fig. 54] function button located next to the entry in the phonebook. All the telephone numbers are displayed in the detailed view, and where applicable, the address recorded for the contact in question.</td>
</tr>
</tbody>
</table>

<table>

<table>
<thead>
<tr>
<th>Send an SMS to a contact</th>
</tr>
</thead>
<tbody>
<tr>
<td>Press the [Fig. 54] function button in the detailed list.</td>
</tr>
</tbody>
</table>

### Possible functions

<table>
<thead>
<tr>
<th>Starting route guidance to the address of a contact</th>
</tr>
</thead>
<tbody>
<tr>
<td>If the address details of a contact have been stored, route guidance can be started for the address of the contact. Press the address data on the detailed view to start route guidance.</td>
</tr>
</tbody>
</table>

### Note

If you edit the number before calling, this will only be used for the call and will not be stored in the phonebook.

### Short messages menu (SMS)

![Fig. 56 Short messages menu (Text messages).]

If the mobile phone connected to the HFP profile also supports the SMS profile, a new function button will appear in the top left-hand corner of the PHONE menu, which will...
allow SMS messages to be received, viewed and sent by the Infotainment system.

The proper operation of the functions mentioned above will depend on the compatibility of the connected mobile telephone.

**Buttons on the Short messages (SMS) menu**

- From the PHONE main menu, press the SMS function button.

**Function button: function**

<table>
<thead>
<tr>
<th>Function button: function</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>New text message</td>
<td>To write and send a text message (includes the possibility of accessing templates with predefined messages).</td>
</tr>

<tbody>
<tr>
<td>Missed calls</td>
<td>Displays the numbers of missed and unanswered calls.</td>
</tr>
</tbody>
</table>
Display: Meaning

- **Dialled numbers**: Indicates the numbers dialled on the mobile telephone and on the Infotainment system telephone management system.
- **Received calls**: Indicates the numbers of the calls received on the mobile telephone and on the Infotainment system telephone management system.

Note

The availability of the call lists will depend on the mobile phone used.

---

### Speed dial buttons

![PHONE main menu](image)

The speed dial buttons [Fig. 58](image) may each be used to store a telephone number from the phonebook.

---

#### Possible functions

<table>
<thead>
<tr>
<th>Function</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Assigning speed dial buttons</strong></td>
<td>Press a <strong>free</strong> speed dial button from the PHONE main menu. Select the desired contact from the list. If the selected contact has several telephone numbers, select the desired number.</td>
</tr>
<tr>
<td><strong>Editing assigned speed dial buttons</strong></td>
<td>Press and hold a <strong>used</strong> speed dial button in the PHONE main menu until the Contacts menu opens. Select the desired contact from the list. If the selected contact has several telephone numbers, select the desired number. To close the Contacts menu without applying the changes, press the BACK function button.</td>
</tr>
<tr>
<td><strong>Deleting assigned speed dial buttons</strong></td>
<td>The telephone numbers stored in the speed dial buttons can be deleted in the <strong>User profile settings</strong> menu <a href="#">Manage favourites</a> table on page 71.</td>
</tr>
</tbody>
</table>

#### Possible functions

<table>
<thead>
<tr>
<th>Function</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Dialling with speed dial buttons</strong></td>
<td>Briefly press an <strong>assigned</strong> speed dial button from the PHONE main menu to call the telephone number that has been stored on it.</td>
</tr>
</tbody>
</table>

---

#### Note

The contacts stored on the speed dial buttons **DO NOT** update automatically. If a contact stored on a speed dial button is modified on the mobile telephone, the speed dial button will need to be reassigned.

---

#### Telephone settings

Press the **SETUP** function button from the PHONE main menu.

**Function button: function**

- **Select phone**: From the list, select the mobile telephone to be connected to the hands-free profile with the Infotainment system.
- **Find telephone**: Press to connect a new mobile telephone.
- **Bluetooth**: Open the Bluetooth setup menu [page 72].
- **User profile**: Open the User profile settings menu [page 72].
**Telephone management system (PHONE)**

**Bluetooth® settings**

In the PHONE main menu, press the **SETUP** function button and then the **Bluetooth** function button.

<table>
<thead>
<tr>
<th>Function button: function</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Bluetooth</strong>: Press to deactivate Bluetooth®. Disconnects all active connections.</td>

</tbody>
</table>

**Connectivity Box**

The Connectivity Box includes different functions that will help to use your mobile device. These functions are the “Wireless Charger” and the “Mobile Signal Amplifier”.

---

**Note**

Some telephones need to be restarted to redownload the most recent contacts added.
The “Wireless Charger” allows mobile devices with Qi technology\(^1\) to be charged without a cable.

The “Mobile Signal Amplifier” allows you to reduce the radiation in the vehicle and enjoy better reception.

For safety reasons, it is recommended that you pair the radio and the mobile device using Bluetooth and place the mobile phone on the Connectivity Box pad, so as to have better reception without having to handle the mobile phone.

“Wireless Charger”

To charge your mobile phone wirelessly:

- Place your mobile device with Qi technology\(^1\) in the middle of the pad with the screen facing up \(\Rightarrow\) Fig. 59.

When you do so, make sure there are no objects between the pad and the mobile phone.

The mobile phone will start charging automatically. For further information about whether your mobile device uses Qi technology, please check your mobile phone’s user manual or visit the SEAT website: www.seat.com.

---

\(^1\) Qi technology allows you to charge your mobile phone wirelessly.

“Mobile Signal Amplifier”

To establish a connection with the vehicle’s external aerial:

- Place your mobile device in the middle of the pad with the screen facing up \(\Rightarrow\) Fig. 59.

When you do so, make sure there are no objects between the pad and the mobile phone. Your mobile phone will automatically be ready to make use of the external aerial.

**WARNING**

The mobile phone may heat up due to the wireless charging. Think about the temperature of your device before you pick it up, and take care when removing it.

**Note**

- Your mobile device must support the Qi wireless inductive charging interface standard for proper operation.
- If your mobile phone has a cover or a protective casing, this may affect the Connectivity Box functions.
- There must be no metallic objects between the pad and the mobile device that might affect the wireless charging or the connection with the external aerial.

- The charging time and the temperature vary in accordance with the device used.
- To avoid malfunction, ensure that the mobile phone is correctly placed on the pad.
- The maximum charging capacity is 5 W.
- Qi technology does not allow you to charge more than one mobile device simultaneously.
- No improvement in the transmission quality can be guaranteed if there is more than one mobile phone on the pad.
Full Link*

Full Link technology description

Introduction

The Full Link system provides a way of bringing together technologies that allow communication between the Infotainment System and mobile devices:

- MirrorLink®
- Android Auto™
- Apple CarPlay™

Data transfer

This communication can allow data to be read and/or written.

From the SETTINGS, Data transfer for SEAT apps menu, there is a checkbox to activate/deactivate the function, and a dropdown menu called Use apps to operate which controls the level of interaction between the Apps and the System: Deactivate, Confirm, and Allow.

Interfaces

Access the Full Link system by pressing the Full Link key or by pressing the MENU key in the infotainment system and then selecting Full Link.

The connection to Full Link is made through a USB interface.

⚠️ WARNING

If a mobile terminal is not secured or is incorrectly secured in the vehicle, it could move around the passenger compartment in the event of a sudden driving manoeuvre, emergency stop or accident, resulting in injury.

- While driving, mobile terminals must be securely fastened in position, outside the airbag deployment zones, or safely stowed away.

⚠️ WARNING

Any applications that are not suitable or execute incorrectly may cause damage to the vehicle, accidents and serious injuries.

- SEAT recommends the use of the Apps that SEAT provides for this vehicle.
- To make full use of SEAT Apps, you must activate the option Setup, “Data transfer for SEAT apps” page 83.
- The interaction level of the Apps on the system must be: ALLOW.
- Protect the mobile terminal with its applications from improper use.

Never make modifications to the applications.

Consult the instruction manual for the mobile terminal.

⚠️ WARNING

The use of applications while driving can distract your attention from the traffic. Distracting the driver in any way can lead to an accident and cause injuries.

- Always drive carefully and responsibly.

⚠️ CAUTION

- In areas where special regulations apply or the use of mobile terminals is forbidden, the mobile terminal must be switched off at all times. The radiation produced by the mobile terminal when switched on may interfere with sensitive technical and medical equipment, possibly resulting in malfunction or damage to the equipment.
- SEAT cannot be held liable for any damage caused to the vehicle as a result of the use of applications that are of poor quality or are defective, the inadequate programming of the applications, the insufficient coverage of the network, the loss of data during transmission or the improper use of mobile terminals.
**Note**

- Use of Full Link technology may result in high consumption of your 3G/4G data plan.
- SEAT recommends having a high battery charge on the device when connected to Full Link.
- SEAT recommends that to use Full Link, the “Date and time” should be correctly configured ▶️ page 83.
- SEAT applications are designed to communicate with the vehicle and interact with it via the Full Link connection, therefore its functionality is linked to the mobile device being connected via USB.
- You can find further information on the technical requirements, compatible devices, suitable applications and availability at www.seat.com or at SEAT dealers.

---

**Is Full Link blocked?**

![Full Link Message on Infotainment system screen.](image)

To unblock this feature, you must obtain the accessory from your SEAT dealer. Otherwise, a message like this will appear on the screen whenever you select the feature ▶️ Fig. 60.
**Requirements for Full Link**

**Fig. 61** Full Link Requirements

Full Link*

**Activation of Full Link**

Data connection via Wi-Fi or SIM is not necessary to establish the connection between the smartphone and Full Link.

Data connection via Wi-Fi or SIM is necessary to enable all of the app features\(^1\).

Proceed as follows to use Full Link:

- Switch on the Infotainment system
- Connect the smartphone to the vehicle’s USB port using a USB cable > [Booklet Instruction manual](#)
- In the main menu for the Full Link setup, select **Activate data transfer for SEAT apps** > [Fig. 62](#)

Finally, a message will appear stating that data transfer will commence when the device is connected. Please note that data is transferred over connections between your vehicle and mobile device. Press **OK**. Once selected, the technology compatible with your device can be used.

![Fig. 62 Full Link Setup](#)

---

**Note**

Depending on your smartphone, it may have to be unlocked for the connection to occur.

---

**What should I do if it does not connect?**

- Restart the mobile device
- Check the USB cable visually.
  Make sure that the USB cable is not damaged. Check that both connections (USB/micro USB) are not damaged or worn.

---

1\(^{\text{Using the data connection to transfer the smartphone apps to Full Link may involve additional charges. Please check the charges with your operator.}}\)
Pairing of portable devices supporting the MirrorLink®, Android Auto™ and/or Apple CarPlay™ technologies

Carousel
When you enter the Full Link context for the first time, the technologies available for pairing the portable device are displayed.

Once the device connects via USB, the system will offer you the technologies available for establishing a connection with your mobile phone.

In the event of simultaneous connections between two devices with different operating systems, a choice will be presented for which one to make the connection with.  

View of the device list

iPhone™ devices only support Apple CarPlay™.

There are some Android devices that support MirrorLink® and Android Auto™.

Bear in mind that once the device is connected, it will not be available as an audio source.

Full Link setup

Function button: function

- Data transfer for SEAT apps: allows the exchange of information between the vehicle and applications authorised by SEAT.

Last Mode

If a session using one technology ends without the disconnection being made from the Infotainment system (simply by disconnecting the cable) then when the device is next connected to it, the session will start without the user being required to take any action.

Information

Consult the mobile device manual.

Depends on each technology:

1. Availability in a country
2. Third party applications

For further information:

- MirrorLink®:
  www.mirrorlink.com
- Apple CarPlay™:
  www.apple.com/ios/carplay
- Android Auto™:
  www.android.com/auto

Note

- In order to use Android Auto™ technology it is necessary to download the Android Auto™ application, located on Google Play™.

1) Unless the device requires the screen to be unlocked in order to establish the connection.
MirrorLink® is a protocol which enables communication between a portable device and the Infotainment system via USB.

Using it makes it possible to display and manage the content and functions displayed on the portable device on the Infotainment system screen.

To avoid distracting the driver while driving, only specially adapted applications can be used. See Introduction on page 74.

Requirements
In order to use MirrorLink®, the following requirements must be met:

- The mobile device must be compatible with MirrorLink®.
- The mobile device must be connected to the Infotainment system via USB.
- Depending on the mobile device used, a suitable application must be installed for the use of MirrorLink® on the device.

Initiating the connection
- In order to initiate the connection with the mobile device, it is simply necessary to connect it to the Infotainment system via the USB connection.
- A pop-up screen will appear, which will request that you accept the device.

Screen orientation: On those devices that support this feature, it is possible to select the following types of screen display orientation:

- Landscape
- Portrait

\( \text{or Rotated 180°} \): Allows you to rotate the image provided by the device by 180°.
Apple CarPlay™

✓ Valid for compatible iPhone™ mobile telephones. Also, iPhone™ mobile telephones only support Apple CarPlay™

Apple CarPlay™ is a protocol which enables communication between a mobile telephone and the Infotainment system via USB. This makes it possible to display and operate the mobile telephone on the Infotainment system screen.

Requirements

In order to use Apple CarPlay™, the following requirements must be met:

- The mobile device must be compatible with Apple CarPlay™.
- The mobile device must be connected to the Infotainment system via USB.

Initiating the connection

In order to initiate the connection with the mobile device, it is simply necessary to connect it to the Infotainment system via the USB connection.

- A pop-up screen will appear, which will request that you accept the device.
- If you are initiating the session using Apple CarPlay™ technology it will not be possible to pair another device via Bluetooth™. The following message will appear in the main PHONE menu.

Please disconnect Apple CarPlay first, before you can connect another mobile telephone.

Holding down the \( \sigma \) button on the multifunction steering wheel will start the Apple™ “voice engine”.

To return to the basic contents of the Infotainment system, press the SEAT icon.

Android Auto™

✓ Valid for compatible Android mobile phones.

Android Auto™ is a protocol which enables communication between a portable device and the Infotainment system via USB.

This makes it possible to display and operate the mobile telephone on the Infotainment system screen.

Requirements

In order to use Android Auto™, the following requirements must be met:

- The mobile device must be compatible with Android Auto™.
- The mobile device must be connected to the Infotainment system via USB.
- The Android Auto™ application should already be downloaded and installed on the mobile device.

Initiating the connection

In order to initiate the connection with the mobile device, it is simply necessary to connect it to the Infotainment system via the USB connection, and to be sure to follow the instructions of the device being paired.

- The first connection to Android Auto™ must be done while the vehicle is stationary.
- Once the first pop-up window about accepting data transfer between the car and the device has been accepted, a message will appear requesting that you check your mobile device for the confirmations needed to pair it with the Infotainment system.
- If you are initiating the session using Android Auto™ technology via USB, the mobile telephone connects automatically via Bluetooth™ to the Infotainment system telephone and it will not be possible to pair another mobile telephone via Bluetooth™.

Holding down the \( \sigma \) button on the multifunction steering wheel will start the Android™ “voice engine”.

Full Link*
To return to the basic contents of the Infotainment system, press the **Return to SEAT** button.

**Note**

Some mobile devices require a change in the USB connection mode in order to use Android Auto™.
- Make sure that your mobile is in “Media Transfer Protocol (MTP)” mode before it is connected by USB to the Infotainment system.

**Note**

Android Auto™ requires the use of services from Google™ and some of the Android system's basic applications.
- Ensure that you always have the latest update of Google™ services in order to use this technology.
## Frequently asked questions about Full Link

<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>What is the connection method?</td>
<td>USB cable.</td>
</tr>
<tr>
<td>Will the USB cable be supplied with the vehicle?</td>
<td>No. The USB cable supplied with the device should be used.</td>
</tr>
<tr>
<td>Is navigation possible?</td>
<td>Navigation is possible in each one of the Full Link technologies if the technology is available in your country and if you have the Navigation app.</td>
</tr>
<tr>
<td>What is the difference between using the Full Link system navigator (via telephone) instead of another navigator?</td>
<td>Advantages: daily updates. Disadvantages: data consumption, reception problems.</td>
</tr>
<tr>
<td>Can I send voice messages?</td>
<td>With certified apps, such as SEAT ConnectApp, you can answer but not send.</td>
</tr>
<tr>
<td>What apps will be visible as I am driving?</td>
<td>Depending on the technology: – for MirrorLink®: apps certified by SEAT and the CCC, – for Android Auto™: the Apps selected by Google™, – for Apple CarPlay™: the Apps selected by Apple™.</td>
</tr>
<tr>
<td>Where can I find compatible Apps?</td>
<td>Compatible apps are shown at the following links: <a href="http://www.mirrorlink.com/">www.mirrorlink.com/</a> <a href="http://www.android.com/auto/">www.android.com/auto/</a> <a href="http://www.apple.com/ios/carplay/">www.apple.com/ios/carplay/</a></td>
</tr>
<tr>
<td>Where can I download the apps?</td>
<td>From Google Play™ for Android Auto™/MirrorLink® and from the Apple Store™ for Apple CarPlay™.</td>
</tr>
<tr>
<td>If Full Link stops working, where can I have it repaired?</td>
<td>If the problem is in the car, you should go to the dealer. If the problem is in the mobile device, you should see your mobile telephone vendor.</td>
</tr>
<tr>
<td>Will WhatsApp be certified?</td>
<td>This depends on the technology.</td>
</tr>
<tr>
<td>Is MirrorLink® available in my country?</td>
<td>Yes, MirrorLink® is available in all the countries and regions where SEAT operates.</td>
</tr>
<tr>
<td>What are the differences between MirrorLink®, Android Auto™ and Apple CarPlay™?</td>
<td>MirrorLink® is not compatible with Android Auto™ or Apple CarPlay™, as they are different technologies. They have all coexist in Full Link, although Android Auto™ is designed for telephones with the Android™ operating system and Apple CarPlay™ is designed for iPhones.</td>
</tr>
<tr>
<td>Can MirrorLink® be installed in a previous SEAT model?</td>
<td>No, that is not possible.</td>
</tr>
</tbody>
</table>
Setup

Menu and system settings

Main menu System settings

The selection of possible settings will depend on the country, the unit in question and the vehicle equipment.

- Press the **MENU** infotainment button and then select **Settings**.
- To adjust the settings for a certain function, press the appropriate function button in the main menu. Changes are automatically stored when a menu is closed.

### Function button: function

**Screen**: To perform screen setup.

- **Select display mode**: Grid or Carousel.
- **Switch off screen (in 10 seconds)**: If this function is active and the Infotainment system is not in use, the screen will switch off after approximately 10 seconds. Pressing the screen or pressing one of the Infotainment system buttons will switch the screen back on.
- **Brightness**: To select the brightness level of the screen.
- **Day/Night**: To select the display type (Day, Night or Automatic).

**Date and time**: To alter the time and date.

- **Clock time source**: To select the time source (GPS or manual).
- **GPS**: The date and time can be selected using the time zone function button. In this case, the date and time function buttons for manually entering the data will not be active.
- **Manually**: The date and time can be manually adjusted using the date and time function buttons.
- **Time**: To manually alter the time.

**Automatic summer time (DST)**: The time is set automatically.

**Time zone**: To change to the desired time zone.

**Time format**: To select the time display format (12- or 24-hour clock).

**Date**: To adjust the current time.

**Date format**: To select the display format for the date (DD.MM.YYYY, YY-MM-DD or MM-DD-YY).

**Idioma/Language**: To select the desired language for the texts and announcements in the voice control system.

**Additional keypad languages**: To select the additional keypad languages.

**Units**: To set the measurement units for the vehicle displays.

| Distance, vehicle speed, temperature, volume, consumption and pressure. |

**Mobile device data transfer**

- **Data transfer for SEAT apps**: Allows the exchange of data between the vehicle and SEAT applications. These are not personal data.
- **Use apps to operate**: Changes the level of interaction with the applications.
  - **Deactivate**: Limits specific functions that require a higher level of security.
  - **Confirm**: Allows 100% functionality of the App but with certain actions relating to the Infotainment system requiring confirmation.
  - **Allow**: Allows the execution of all the available functions from the App.

**Voice control**: To perform the voice control setup.

**Remove safely**: To eject the data storage device (SD card 1/SD card 2/USB) from the system. After correctly ejecting the data storage device from the system, the function button becomes inactive (grey colour).

**Factory settings**: When resetting factory settings, all entries and changes made are deleted, depending on the selected setup.

**Bluetooth**: To perform Bluetooth® settings.

**WLAN**: To adjust the WLAN mobile hotspot settings.

---

83
Setup

**Function button: function**

- **System information**: Viewing system information (device number, hardware and software versions).
- **Update**: To update navigation data. Do not remove the memory card while the navigation data is being installed.
- **Copyright**: Copyright information.
- **Configuration wizard**: Open the wizard to configure the initial setup of the Infotainment system.

*a* Only available for the model: “Navi System Plus”.

**Note**

For the proper functioning of the Infotainment system it is important that the date and time set in the vehicle are correct.

---

**Sound and volume settings**

**Making settings**

The selection of possible settings will depend on the country, the unit in question and the vehicle equipment.

- Press the **MENU** infotainment button and then select **Sound** to open the **Sound settings** main menu.
- Press the function button on the main menu corresponding to one where changes are to be made. All settings are applied instantaneously.

**Overview of screen and function buttons**

**Function button: function**

- **Volume**: To adjust the volume settings.
  - **Announcements**: To set the playback volume of announcements, for example traffic announcements.
  - **Navigation announcements**: To adjust the playback volume of audible driving recommendations.
  - **Voice control**: To set the volume for voice control playback.
  - **Maximum switch-on volume**: To set the maximum switch-on volume of the equipment.
  - **Speed-dependent volume adjustment (GALA)**: To determine the level of adjustment for speed-dependent volume. The audio volume will increase automatically as vehicle speed increases.
  - **Fading Entertainment when parking**: To adjust the desired decrease in volume with ParkPilot activated.
  - **Entertainment fading (nav. announc.)**: Adjusts the playback volume during a navigation announcement.
  - **AUX volume**: To set the playback volume of the audio sources connected via the AUX-IN multi-media socket (Low, Medium or High). Also see **page 84**, Overview of screen and function buttons.
  - **Bluetooth audio**: To set the playback volume of the audio sources connected via Bluetooth® (Low, Medium or High). Also see **page 84**, Overview of screen and function buttons.

**Function button: function**

- **Equaliser**: To adjust the characteristics of the sound.
- **Balance - Fader**: To adjust the distribution of the sound. The cursor indicates the current distribution of the sound inside the passenger compartment. To modify the distribution of the sound, briefly press the passenger compartment view for the desired position or use the arrow keys to change it gradually. To focus the distribution of sound in the centre of the passenger compartment, press the central function button located between the arrows.
  - **Sound focus**: Optimises the sound in the passenger compartment.
  - **Subwoofer**: To adjust the intensity of the subwoofer.
  - **Touchscreen tone**: Confirmation tone for pressing a function button is activated.
  - **No voice guidance during call**: No audible driving instructions will be given during a telephone conversation.

---

**Adjust the playback volume for external audio sources**

If you need to increase the playback volume for the external audio source, first lower the base volume on the Infotainment system.

If the sound from the external audio source is **too low**, increase the **output volume** on the external audio source. If this is not enough, change the **input volume** to **medium** or **high**.

If the sound from the connected external audio source is **too loud or distorted**, lower the **output volume** on the external audio source.
If this is not sufficient, set the **input volume** to **Medium** or **Quiet**.
Other important information

**Legal information**

**ECE**

SEAT hereby declares that the unit is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC (CE 0700).
